Description

Please describe details of the proposed development or works including any change of use

As part of the Public Sector Decarbonisation Scheme, we are proposing to upgrade the school to low carbon heating, inclusive of 5x roof mounted air source heat pumps housed within a non-slip box section frame (see document: base submission.pdf) adjacent to the plant room. To further support the low carbon heating upgrade, we are proposing to improve the building insulation and undergo a partial radiator upgrade throughout.

Manchester Communication Academy is a mixed, non-selective school, serving local children and part of the Greater Manchester Academies Trust. As a large school we use over 1,000,000 Kwh of Gas every year. The school is aiming to reduce its carbon emissions mainly due to the use of inefficient gas systems by installing a low carbon Air Source Heat Pump cascading System.
