Good morning, John,

497 Palatine Road Manchester M22 4DH - 137645/TPO/2023

The applicant has proposed to carry out the following pruning works:

T1) Oak - this mature oak grows at the bottom of the garden of 497 Palatine road. It has a very large spreading canopy which completely covers the small garden of 4 Brandon Ave and is overhanging the roof of the property. There is one very long, thin (12cm diameter), horizontal branch that overhangs the roof slightly and looks weak and a potential candidate for sudden branch drop. We would like to remove this branch back to the trunk and cut back the others that overhang the roof by approximately 2.5m to suitable secondary branches, so there is nothing overhanging the roof and there is around 1m clearance. We would like to do this reduction over the garden of 4 Brandon Ave but blend/grade the work into the remaining canopy to maintain a nice round shape to the overall crown of the tree without reducing the 3 quarters of the tree that do not affect 4 Brandon ave. Please see attached photos for an idea of the extent of this proposed work.

In the images provided by the applicant, we can clearly see the proposed pruning points and I can confirm that we would have no objection to the proposed pruning work. The above work would be considered to be general tree management in an urban enviroment.

Kind regards

Rudi Farghaly
