Job No: CL/45483

Refurbishment Project

Date: 06/07/2023

Prepared by Philip A Schofield

We are fortunate enough to have two current facilities currently providing the service to be housed at Belthorne Avenue, which is currently at French Barn Lane in Blackley and proposed to move to the new site and also at Acorn House in West Didsbury. There is no planned increase in staff or visitor numbers from the current facility which has 15 full time staff and as such we can use the current situation as a prototype which generates waste from staff and visitors with a high degree of certainty.

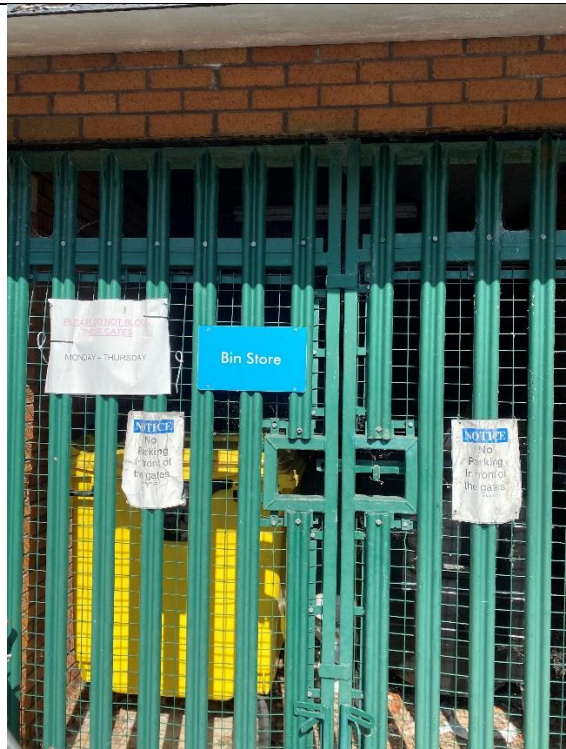

The existing site at French Barn Lane (moving to Belthorne) does not recycle waste. The waste is collected by BIFFA on a Tuesday weekly. They have one bin pictured in the photo below.

We propose to have two bins at the new facility general waste collected weekly and a separate paper and cardboard which will be collected fortnightly (this currently happens at our sister site to Belthorne, at Acorns House).

The bins will be securely housed in the bin store as seen on the photos below.

Existing Bin Store to be Utilised.

Store houses two 1100 litre wheeled bins.

Store internally with side pedestrian door.

Existing bin at the French Barn Lane facility (to be demolished and relocated to the new facility)
