To whom it may concern,

Please take this email as my formal objection to the planned 12 storey development on Tariff Street.

The development of this building would result in a significant lack of light to my property, effecting my wellbeing and almost certainly increasing my energy bills. I work full time from home and when I bought the property last year the natural light in the property was one of the main factors I considered. Further concerns include the lack of privacy it would lead to, with many apartments being directly opposite mine and all windows in my property being full length. In addition, the building work from the current 31 storey development next door is already causing disturbance, so an additional building site even closer will only increase this.

To conclude, the construction of this development would have a significant adverse impact on both my financial and mental wellbeing.

Regards,

[REDACTED]
