

Optimum 200

Straight and curved stair Platform Lift

Options shown - special colour and flip down seat

Options shown - back panels and extended ramp

About the Optimum 200

The Optimum 200 is one of the best quality stair platform lifts available and is suitable for both internal and external use. The unit is supplied with a platform compatible with Part M of the Building Regulations, although smaller platforms are available should space be a dictating factor. The unit is probably the slimmest unit on the market, is aesthetically pleasing and very reliable. The unit has been designed to transport the occupant in comfort along a straight or curved path.

The Optimum 200 is a well established design which has proven reliability for the carrying of various designs of wheelchairs and their occupants, to a maximum capacity of 300kg. This unit is fully compliant with the Machinery Directive.

Standard Features

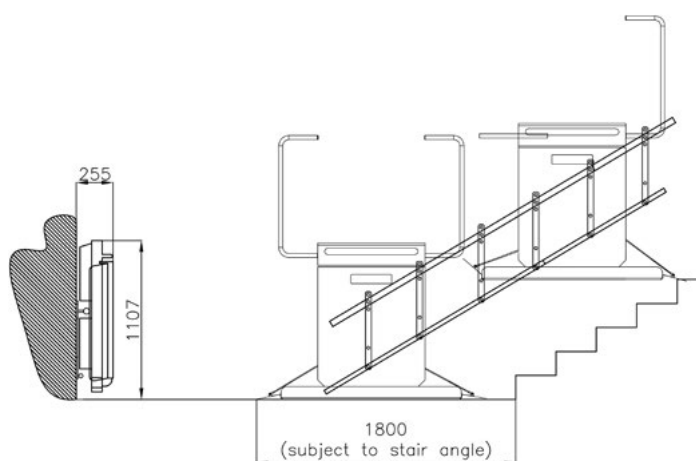

- 1250mm x 800mm platform, **Part M compliant**
- **Stainless steel drive rails** - upper one can be used as handrail
- **300kg** capacity
- **0.11 metres/second** travel speed
- **Projects 250mm** from wall when folded (+70mm when stanchion mounted)
- **Wireless** wall mounted landing pushes
- **Barrier arms fold down** when parked
- **Operates from battery** in the event of power failure
- **Hard wearing** powder coat finish in RAL9006
- **3 Year warranty** on major drive components.
- **Pressure sensitive** under tray

Installation

Installation of the Optimum 200 usually takes about one day and the unit would normally be attached to a load-bearing wall. We can however mount the unit on floor mounted stanchions (optional extra) should a structural wall not be available, providing that the floors are of a solid construction. A standard 240V power supply is necessary at the top or bottom level to allow installation.

Range of options

- Rail mounted push boxes
- Stainless steel carriage cover, barrier arms and floor
- Range of RAL colours
- Stanchion mounting (requires extra space of 70mm)
- Fold down seat
- Extended horizontal rail at upper level

Above drawing is based on a platform size of 1250 x 800
NB: dimensions will vary depending on selected platform size

Options: upper rail extension (left) and fold down seat (right)

Available sizes
