Manchester City Council gives notice that the detail(s) referred to in Part 1 are **Refused** in accordance with the information set out below.

Drainage Maintenance

Following an assessment of the submitted information , it was advised on 7th July 2023 that further information was needed to confirm that the proposed drainage has been installed as per the planning approval. The required evidence included :- the submission of the built surface water drainage layout, including engineering details, the attenuation tank dimensions and all invert/cover levels to outfall; a location plan demonstrating photo locations; images from both attenuation tank installations in accordance with drawing no: 19045-YH-B-380; Hydro-brake manhole images for - S26 and S13, and the management and maintenance plan for the whole surface water drainage system, considering the lifetime of development (including the private management company details).

Concerns regarding the durability and strength of the measures to alleviate leakage to and from the attenuation tank inlet and outlet locations, with the need for a more durable design, to ensure a free-flowing structure for the development lifetime expected was also raised.

On the basis that none of the outstanding information has been provided for consideration, this application to discharge condition no. 15 is refused.
