WHY CHOOSE TIGER?

It's not just the standard of the wood we use that defines a Tiger and marks it out as a high quality building, but the finishing touches and the extra care we take to ensure you can find your perfect space.

SOLID 12MM CLADDING

Tiger buildings are constructed with shiplap cladding, which is superior tongue & groove timber board with a flush-fit finish. Each solid plank is 12mm thick with scalloping to help prevent water ingress. A smooth, solid, strong barrier pre-treated to meet our high quality standards.

Product Description

The Tiger Pent Bike Store offers a fantastic pent roofed alternative to our popular Tiger Bike Shed. Ideal for the storage of bikes - this Pent Roof Bike Shed can happily accomodate a wide variety of gardening equipment, lawnmowers, tools or any other gardening essentials you may wish to keep under cover. The Tiger Pent Bike Shed also has pre-hung extra wide double doors allowing for easy access.

Comprised with our high quality European Softwood 12mm Shiplap Tongue and Groove cladding, this bike storage solution will last for years. The Tiger Pent Bike Shed comes complete with a shed lock and key for security and has shoot bolts on the doors to allow for extra security.

BEWARE OF CHEAP IMITATION BIKE SHEDS:

Unlike many budget competitor products this building is built with only the highest quality materials and many garden buildings in the market simply cannot compare!

- **THIS Bike Shed** is clad with high grade 12mm finish shiplap tongue and groove cladding – beware of buildings that feature poorly finished rough edged boards milled out of inferior timber often with a thinner finish.
- **THIS Bike Shed** features heavyweight ‘rounded 4 corner’ 28x44mm finish framework throughout giving it the strength to last – beware of buildings that use rough sawn ‘matchstick thin’ framework that barely hold the building together.

- **THIS Bike Shed** features thick tongue and grooved floorboard in the floor and roof sections and contains NO cheap sheet materials such as OSB or chipboard – beware of buildings that use single piece OSB / chipboard roofs that offer little protection in the areas where you need it most.

It is essential that this bike shed is assembled strictly in accordance with the instructions supplied on a firm and level base constructed from a suitably durable material. It should also be treated shortly after assembly and then annually thereafter with an appropriate high quality preservative and all glazing units must be sealed, inside and out, with silicone or other water tight sealant. For more information on how to correctly assemble and maintain your garden building please consult our comprehensive [help centre](#).

All images and photography used is purely for illustrative purposes only – actual product colours may vary slightly due to the digital photography process and variations in individual user monitor settings.
