Subject: Re: Invalid letter for application 136849/LO/2023

Just to add to these method statements:

I will not be attaching anything other than an illuminated sign (which will be close to the front window in the centre), to the ceiling of this unit.

The walls of the treatment rooms are freestanding and 8 foot high, whereas the ceiling must be about 12 foot high. There will be no roof/covering on the treatment rooms.

I have amended the method statements below accordingly.

Kind Regards,
Fiona Clancy.

> The walls will be be 8 ft high and attached to the stud wall on the left hand side of the unit, so as not to affect the original fabric of the building. The treatment rooms will not have a roof covering and will not be attached to the ceiling.
>
> They will be attached with 4 plasterboard screws on one side and 4 plasterboard screws on the other side. So 8 blaster board screws for each treatment room. So a total of 16 screws in the stud wall in front of the original wall.
>
> **Method Statement for fitting the illuminated sign.**
>
> In a total of 8 positions, close to the front window in the middle, we will be drilling through the existing 12mm plasterboard bulkhead ceiling with a 14mm hole. These holes will house the M8 Spring Toggle fixings that we will be using to install the framework for the sign to the underside of the false ceiling.
>
> These fixings act as a clamp within the ceiling void to the 12mm plasterboard. There are no fixings to be put into the subframe of the building, they are only to be secured to the plasterboard which is superficial
