Cafe, Nothern Hub

MANCHESTER | BRIEF

Allpress Manchester will be the first home outside of the Greater London area for the UK division. It will be a high functioning site with multiple purposes; new quarters for the Northern team, a training area for the region, a place to repair and nurture key equipment, then ultimately a place to experience the brand in a holistic sense - a full brand experience, including fresh espresso and seasonal food.

The space should feel versatile and welcoming, the ability to wonder and engage with the various elements of the brand, to feel the attention and commitment to detail that Allpress have across all areas of the business.

The cafe will offer concise preparations of the best of what Allpress do alongside a generous retail offering to explore.

AMBIENCE

Floor recessed gardens frame the entrance, softening the harder materials of the space and giving a sense of nature and calm

The painted back drop further serves to highlight the extensive windows in the space. Making light a material

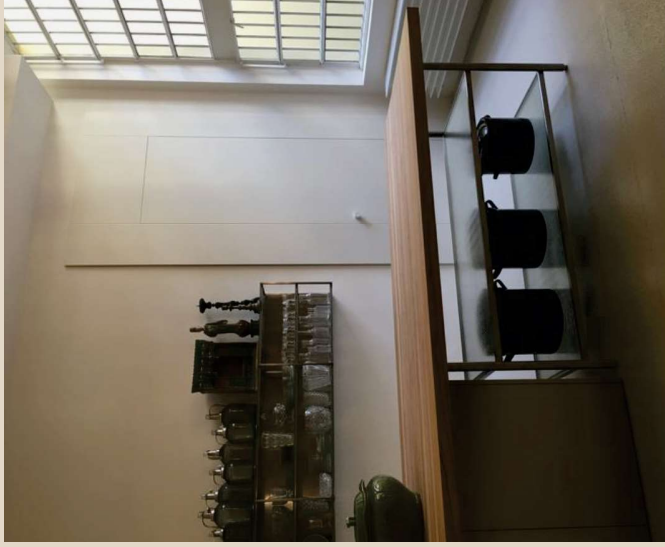

Combining 3 key elements of the building, brick | light and introducing key materials of timber and concrete

Large amounts of stainless steel offer a cool but functional aesthetic to the space

Perforated metal allows a peek into 'behind the scenes' and plays with light and transparency

Larger areas of steel are off set with timber to soften and balance the space

Frosted and diffused glass adds textural play and hides areas which may become unkempt

Warm cream walls with comfortable, inviting areas of upholstery and timber tables

An open kitchen with clever elements of partitioning and shelving

The recessed timber retail area, the first area of customer engagement

Timber partitioning creates a symmetry with the service kitchen, pulling together the design elements across the space and highlighting the ceiling

A simple domestic feeling kitchen with a combination of steel and timber allows the space to be robust and warm at the same time

A neutral, clean feeling to the room with a mix of powder coated, off the rack shelving, PLY or MDF elements mixed with some timber. Storage containers are kept clear and light in colour. Work benches and trolleys on wheels to add flexibility in the space.

PALETTE

Oak tables, stools and core joinery

Dark, inviting upholstered seating

A warm white backdrop

Brushed stainless steel throughout

A mix of exposed aggregate and smooth concrete which will help delineate spaces

LAYOUT | *FINAL*

FINAL LAYOUT

Ground floor covers : 22
Training Room : 6 - 8
Exterior : Benches + tables (TBC)

Standing height (900mm) desk area
with adjustable stool

Storage racking with plastic boxes

Tool storage

Sink

Coffee equipment
