

Incorporating over 1250 colours
Including the A1 range

PermaRock has specially developed this colour range to provide architects and specifiers with the latest offerings in render technology whilst bringing near limitless colour options.

The PermaRock colour range, available for use with PermaRock's Acrylic & Silicone^{Ultra} textured through-coloured renders and façade coatings, offers an exceptional 1250+ colour tones, across many lightness levels, to provide an unprecedented colour palette for building designers.

PermaRock A1 Colour Range

The A1 range provides 600 colour shades with the highest binder stability (resistance to chalking) and pigment stability (light fastness/colour retention) achieving Class A1 (Class A binders coupled with Class 1 pigments) as classified by B.F.S (Fact Sheet 26).

Formulated entirely with inorganic pigments, the colour range is designed to compliment PermaRock's Silicone^{Ultra} Renders and Facade coatings which employ unique binder combinations.

This combination of carefully selected materials confers a number of key benefits over standard colour ranges employed with conventional acrylic and 'standard' silicone renders and coatings offering enhanced colour depth and longevity performance.

Specifying Darker Colours

In relation to colour shades with a Lightness Factor of 20 or below, one must consider factors associated with high solar gain and colour stability, particularly on Phenolic and EPS based external wall insulation systems.

Please consult PermaRock for advice should you be looking to utilise such colours.
