

1. Introduction

This document demonstrates the plans and how they are put in place to protect the trees and roots during the works on site at The Rossett. The following Includes;

- Tree Protection Harris Fencing
- Tree Protection Base Plates
- Tree Protection Remediation Plan A3

2. Tree Protection Harris Fencing

Below is a diagram showing the fencing that will be used around the stump of the trees for protection against anything knocking and damaging the base of the tree.

3. Tree Protection Base Plate

Below is a Picture showing the base plate that will be placed on the floor at the base of the tree to the roots underground. This will protect the roots from anything traversing back and forward over the area.

Tree Protection Remediation Plan
