pdr.	powder room	DP	downpipe	EM	electricity meter
Refer to General Notes For Details					
All structure shown as graphic representation: please refer to structural engineering package for exact details of footings, concrete slab, timber framed floors, wall & roof framing					

Notes
- Do not scale this drawing. All dimensions are to be verified on site and any discrepancies reported before commencement of any work or shop drawings
- All new windows and doors sizes indicated are to structural openings and to be site measured. Window style/ detailing and opening sash locations to be confirmed and approved by owner prior to fabrication. All new windows require means of escape with an unobstructed openable area of 0.33sq.m. and at least 450mm high and 450mm wide. The bottom of the openable area should not be more than 1100mm above floor level. All windows to achieve the minimum U values specified in the British Standards.
- All floors (suspended or on ground) walls and roofs are to be insulated and achieve at least the minimum U values listed under Approved Document Part L of the British Regulations.
- Confirm all finishes and materials with owner.
All works to be constructed in accordance with accredited construction details

Notes on setting out	Brickwork
All opening sizes are to structural openings FR = Fire rated door where required	windpost and restraint requirements for piers less than 665mm wide to be confirmed by structural engineer
 (w) x (h) FR	 (w) x (h) sill height above FFL
	- Provide DPC min. 150mm above natural ground level - Provide weep holes at 900mm centers above all openings
