Dear Adam,

I'm a resident of Cranmer Road, Didsbury and I have received the information explaining the plans for the 15metre mast on Fog Lane. I am emailing today to object to this project.

It is incredibly disappointing that residents have not been consulted on this plan and that the City Council don't seem to have given much thought to this location.

I object on the grounds on the height of the mast being 15 metres and request confirmation of the size of the mast in its entirety. Please can this information be properly explained and circulated.

In terms of the location - Fog Lane & Cranmer Road are not remotely close to the surveyors ideal location to site the mast so it feels completely unnecessary to plonk the mast in the suggested site over 0.5 miles away from where the mast *should* be and therefore I question how much the mast will improve mobile coverage to the desired extent. There must in the 0.5 miles between the suggested site and the surveyors ideal site be a better fit site in a more commercial location NOT slap bang in the midst of an attractive residential area.

I would be interested to know why Fog Lane / Cranmer Road is regarded as less residential than other sites regarded too residential for such a mast. It is mind boggling. Therefore, I ask for the council to reconsider a more commercial area of which there are many in Didsbury.

I look forward to your response and very much hope the voices of the residents are heard and our objections respected and acted upon.

Mrs A. Good

Cranmer Rd, Didsbury
