

Further to our recent meeting on the above site we have pleasure in quoting the following prices to supply and install fencing and gates to block off the pedestrian passageway as discussed:

a) Supply and install 1nr 1.8m high single leaf steel palisade gate

b) Supply and install 1nr 2.4m high single leaf steel palisade gate

with a makeup panel of fencing to the side to block the gap.

These prices are based on the steel supplied being in a galvanised and red powder coated finish. Please note that we have not included for any padlocks for the gates as the school probably has suited locks.

Thanks

Dale Cook,

Engineering technician,
