

Architectural elevation drawing of a house. The drawing shows a two-story structure with a gabled roof. The left side features a brick chimney with a double door at the base. The right side is a plain white wall with a single door and two windows. A red dashed line indicates the ground level. Dimensions are provided on the left: 3400 for the total height and 3000 for the height of the brick section.

Rear Elevation

Side Elevation From 167

This architectural drawing shows the side elevation of a building from the west. The structure features a gabled roof on the left side, which transitions into a flat roof section. A small, light-colored rectangular feature, possibly a vent or a small window, is located on the flat roof. The main body of the building is finished with a dark brick pattern. To the left of the brick section, there is a vertical line indicating a boundary or a change in elevation. On the right side, two vertical dimension lines are shown: one indicating a height of 3000 units and another indicating a total height of 3400 units. A red dashed line runs horizontally across the base of the building, likely representing a ground level or a specific elevation marker.
