Hi Sam & Peter,

Hope you're both well and happy with the progress at Baguley Hall so far!
We would like to start getting the images printed to board over the windows

I have attached the email trail below of the comments made but it's looking like this image will best suit

They will be able to crop out the necessary areas to match the existing windows
If you think this is acceptable, I shall get the order placed
If you would like to have a look yourselves, the stock photo library the company uses is <https://depositphotos.com/>

Kind regards,

Mary Rawlings

Hi Mary,

Yep I could cut the window out to remove the walls no problem.

I'm thinking the top one might work better as there isn't as much reflection in the window.

Thanks
John

Hi John,

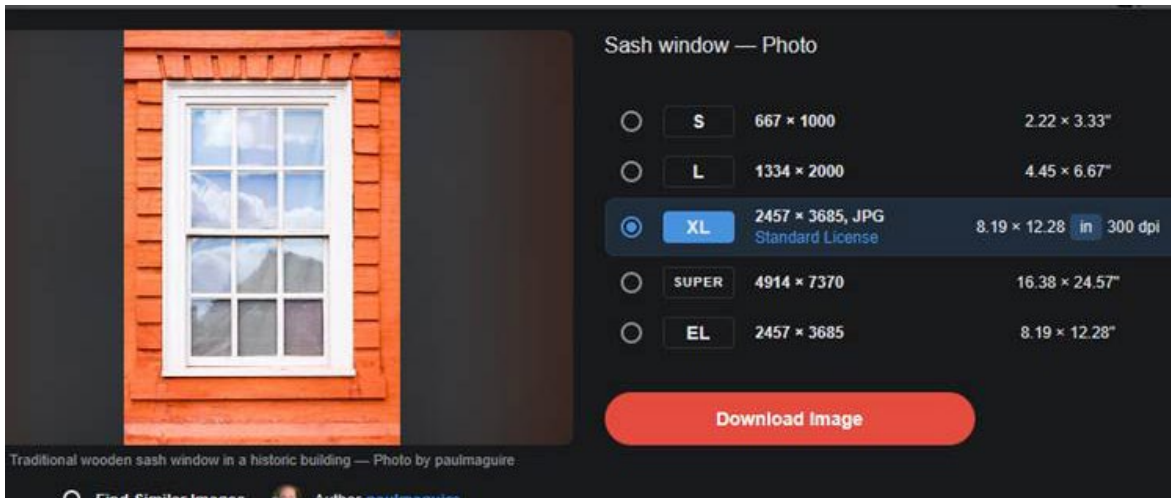

Not a problem, thank you for getting back to me

We are currently in the process of measuring the window sizes

I have a quick query- these two images are what we have in mind for the prints, would it be possible to trim the image to remove the masonry/terracotta wall? Would that affect anything?

A screenshot of a photo download interface. On the left is a photograph of two white-framed sash windows set into a red brick wall. Below the photo is a caption: "Two Sash Windows in Brick Wall, Split Toning Shallow Depth of Field Architecture Details — Photo by jacekspix". On the right, the title "Two Sash Windows in Brick Wall — Photo" is displayed above a list of download options. Each option includes a radio button, a size label (S, L, XL, SUPER, EL), dimensions in pixels, and dimensions in inches. The "XL" option is selected and highlighted with a blue background. Below the list is a red "Download Image" button.

Option	Dimensions (px)	Dimensions (in)
☐ S	1000 × 667	3.33 × 2.22"
☐ L	2000 × 1333	6.67 × 4.44"
☒ XL	3150 × 2100, JPG Standard License	10.50 × 7.00 in 300 dpi
☐ SUPER	6300 × 4200	21.00 × 14.00"
☐ EL	3150 × 2100	10.50 × 7.00"

Kind regards,

Mary Rawlings

Hi Mary,

Sorry I thought I had sent you the link already but it was sat in my drafts.

If you can get all the measurements over when they have been done.

The stock photo library we use is <https://depositphotos.com/>

Have a click through on there and see if you can find something suitable.

I suppose the tricky bit will be adapting an image to work for all the different window sizes but we will be able to work

something out!

Let me know if you have any questions.

Thanks

John
