Informatives

This decision relates to the extension or improvement of an existing dwellinghouse, falling within Class C3 of the Town and Country Planning (Use Classes) Order 1987 (as amended) and does not infer or imply approval for the use of the property for any other purpose.

Manchester City Council has made an Article 4 Direction to remove permitted development rights that allow for a change of use from Class C3 - *Dwellinghouses* to Class C4 - *House in Multiple Occupation*. This means that from 8 October 2011, planning permission is required for a change of use from a Dwellinghouse to a House in Multiple Occupation. Further information regarding the Article 4 direction can be found on Manchester City Council's website:

www.manchester.gov.uk/info/200074/planning/4847/article_4_direction

If you intend to use the property to which this decision relates for any purpose other than a dwellinghouse, you should first contact Manchester City Council's Planning Service. Failure to obtain any necessary planning permission prior to carrying out a material change of use or physical development could result in enforcement action being taken, which can have serious implications.

This permission does not grant approval under Building Regulations.

As per the FRA, the proposed extension is within Flood Zone 2-3, floor levels should be set no lower than existing floor levels of the existing property. (+37.92)

The site is within Flood Zone 2-3 and an Environment Agency Flood Warning Area. The applicant is encouraged to consider signing up for Environment Agency Flood Warnings - <https://www.gov.uk/sign-up-for-flood-warnings>

The applicant should design and construct drainage system to prevent the increased risk of flooding, to improve and protect water quality and ensure future maintenance of the surface water drainage system. We recommend considering green SuDS components to mitigate for any loss of permeable area.

MCC records highlights an underground culverted ordinary watercourse (Ley Brook) is located within close proximity to the site (approximately 100m north of the site), while our records are frequently updated to ensure the highest level of accuracy, the records cannot guarantee 100% accuracy for all MCC underground assets. Therefore, we would request that the applicant informs the onsite contractor to remain observant and to take the appropriate safety precautions during excavation works. If any major unknown drainage assets are found beneath the site, then further investigation works should take place to identify the asset and MCC should be contacted immediately.
