Growth & Development

Delegated officer report for planning application

Application no. 135634/VO/2022

Date registered valid: 15 February 2023

Proposal: CITY COUNCIL DEVELOPMENT Installation of photo voltaic panels to the existing roof, installation of air source heat pumps to the rear of the property in an enclosure and erection of an electrical substation

Address: Hall Lane Resource Centre , Hall Lane, Manchester, M23 1WD

Ward(s): Baguley Ward

Applicant: Mr Benjamin Smith Manchester City Council

Agent (if any): Mr Rob Swiatek AA Projects

Case officer: Robert Griffin
Tel: 0161 234 4527
Email: robert.griffin@manchester.gov.uk

Recommendation: Approve

Date of recommendation: 25th April 2023

Application details

Type of application: Regulation 3 Consent

Development type: Minor Other

Date of site visit: 21.04.2023

Standard consultations:

Printed: 2 March 2023 Expired: 23 March 2023

Neighbour notifications

Printed: 2 March 2023 Expired: 23 March 2023

Site notice

No site notice has been produced

Press advert

No press advert had been published

Departure from Development Plan: No

Environmental Statement: Not required

Description of site/building

Listed building: Not applicable

Conservation area: Not applicable

Tree Preservation Order: Not applicable

Description of area

The application site is located within a predominantly residential area associated with the post war growth and development of Wythenshawe. To the east and south are two storey residential properties whilst on the opposite side of Hall Lane are larger scale apartment and mixed use blocks three storeys in height. Hall Lane is a busy north -south road connecting the area to the main east -west Altrincham Road (A560) to the north.

The Grade I and Schedule Ancient Monument of Baguely Hall buildings and grounds is located immediately to the north of the application site

The application building is a series of connecting single and two storey brick buildings with associated landscaping and car parking. The building is in community use used to provide 24/7 support for adults requiring learning support or other challenges.

Description of development

Installation of photo voltaic panels to the existing roof, installation of air source heat pumps to the rear of the property in an enclosure and erection of an electrical substation.

Consultations & Notification Responses

Nearby properties were notified of the proposals. no responses were received.

Environmental Health - Recommend that a noise condition be attached to any approval to ensure that the proposed electricity sub station would not generate unacceptable noise. They confirm that the noise assessment prepared for the Air Source Heat Pumps is acceptable subject to verification.

Aerodrome Safeguarding Officer - No objection, recommend a crane advisory be attached to any decision as an informative.

Cadent Gas - Have requested an informative be attached to any decision advising the applicant of potential gas infrastructure in the vicinity of the development.

Policy

Relevant policies within the Development Plan for the consideration of the application proposals are:

Manchester Core Strategy

SP1 - Spatial Principles

DM1 - Development Management

EN3 - Heritage

EN4 - Reducing Co2 Emissions

EN6 - Target framework for Co2 reductions

National Planning Policy Framework

Paragraphs: 10 &11 (presumption in favour of sustainable development); 154 (reduce greenhouse gas emissions); 155 (increase use and supply of renewable and low carbon energy and heat); 158 (approve applications for renewable and low carbon development if impacts are acceptable) 199-202 (conserving and enhancing the historic environment).

Issues

The principle for the provision of low and zero carbon energy infrastructure is generally considered acceptable subject to further consideration of impacts on residential and visual amenity; and potential impacts on the setting of Baguely Hall.

Residential Amenity – The proposed PV panels are to be installed on a south facing roof towards the Hall Lane frontage. This part of the roof is well separated from residential properties with the closest being to the west on the opposite side of Hall Lane (approx. 40m), further residential properties are located approximately 50 metres to the south on Porlock Road. Given the siting of the roof PV panels and the distances from nearby residential properties it is not considered that these would give rise to unacceptable impacts on residential amenity in terms of glare and this is confirmed in the submitted Glint and Glare assessment.

The proposed Air Source Heat Pump compound is to be sited to the rear of the existing centre closest to the sites boundary with residential properties on Rissington Avenue. This compound would be sited approximately 30 meters from the rear of those properties and be 9.9m in depth, 2.4 in width, and 2.5m. The equipment would sit on a concrete floor slab and be surrounded in a 2.4 m high fence. The application is supported by a noise impact assessment which has been reviewed and assessed, it concludes that this equipment would not give rise to unacceptable impacts on the amenity of nearby occupiers of residential properties and no further mitigation is required.

The proposed electricity sub station would be located towards the Hall Lane frontage of the site and would be a GRP finished building to house electricity switch gear. The GRP sub station would have an overall height of approximately 2.7m, a width of 3.1 and depth of 3.8 metres. The finish of the sub station is similar to others installed across the City and is of a standard design, many of which sit within residential areas. The GRP kiosk would be situated on the road frontage of the site and would have a fence compound around it all located within the application site. This structure has been sited to avoid vegetation and trees on the site and also to enable an efficient connection to the existing electricity distribution network. Whilst the submitted noise impact assessment has not considered this equipment the recommendation of MCC Environmental Health is that a condition be attached to any approval for further noise work to be undertaken to ensure that this does not impact on residential amenity. Given the prevalence of these types of installation in similar circumstances and residential areas the attaching of a condition is considered acceptable in this instance.

Visual Amenity – The electricity substation would be located towards the front of the site, this is a visible location within the street context and would be forward of the building line of the main part of the resource centre buildings. The substation would be enclosed within a fenced compound, the position of on and off-site trees would assist in reducing the visual impact of this installation as would its small scale nature. It is proposed that conditions be attached to any decision for the final approval of the type of fencing around this installation and colour of the GRP finish to the substation.

The ASHP and compound would be located to the rear of the property. The presence of boundary treatments and vegetation to the rear boundary with residential properties would reduce visual impacts on neighbouring properties. The location of this element of the proposal is considered acceptable.

The PV panels would be on a front roof element of the property, these would be visible when traveling north along Hall Lane. However, they would be read in line with the roof plane and would not give rise to unacceptable visual impacts.

Impact on the setting of Grade I Baguely Hall – Baguely Hall is described as a Manor house, subsequently farmhouse. Probably mid C14, with late medieval north wing (remodelled in C17), C16 porch, late C17 or early C18 south wing; altered. Timber-framed hall, timber-framed north wing subsequently cased in brick, brick south wing, stone slate roofs within the list entry on Historic England's website.

The grounds around the building are enclosed with high hedging on its southern and south western edges with the Hall building being set back from Hall Lane by 30 metres.

The application proposals are sited away from the Hall and would not be viewed in association with the listed building or its grounds. The sub station to be located at the front of the site would be 75m to the south of the southern boundary of the Hall's grounds and approximately 140 metres from the Halls buildings. The proposed PV array would be sites on the south facing roof plane of the main Resource Centre building whilst the ASHP compound would be located to the rear of the site. There are intervening and closer buildings to the Hall than the proposals set out in this application. Given this context, surrounding buildings and siting of the proposals it is considered that the proposals would give rise to less than substantial harm to the significance of Baguely Hall and in this instance the public benefit to be secured by way of introducing low and zero carbon energy generation at the application site is considered to outweigh any harm in this instance.

Conclusion – The proposals would allow the decarbonisation of the energy use of the application property. Whilst additions and infrastructure required for the proposals would be

visible within the street scene these impacts are not considered to be so significant as to warrant refusal of the application.

Other Legislative Requirements

Equality Act 2010

Section 149 (Public Sector Equality Duty) of the Equality Act 2010 requires due regard to the need to: Eliminate unlawful discrimination, harassment and victimisation and other conduct prohibited by the Act and; Advance equality of opportunity between persons who share a protected characteristic and persons who do not share it. The Equality Duty does not impose a legal requirement to conduct an Equality Impact Assessment. Compliance with the Equality Duty involves consciously thinking about the aims of the Equality Duty as part of the process of decision-making.

Human Rights Act 1998 considerations

This application needs to be considered against the provisions of the Human Rights Act 1998. Under Article 6, the applicants (and those third parties, including local residents, who have made representations) have a right to a fair hearing and to this end the local planning authority must give full consideration to their comments.

Protocol 1 Article 1, and Article 8 where appropriate, confer(s) a right of respect for a person's home, other land and business assets. In taking account of all material considerations, including Council policy as set out in the Core Strategy and saved policies of the Unitary Development Plan, the Director of Planning, Building Control & Licensing has concluded that some rights conferred by these articles on the applicant(s)/objector(s)/resident(s) and other occupiers and owners of nearby land that might be affected may be interfered with but that that interference is in accordance with the law and justified by being in the public interest and on the basis of the planning merits of the development proposal. She believes that any restriction on these rights posed by the recommendation given is proportionate to the wider benefits of and that such a decision falls within the margin of discretion afforded to the Council under the Town and Country Planning Acts.

Recommendation: Approve

Article 35 Declaration

The application has been dealt with in a positive and proactive manner, in this instance no issues have arisen during consideration of the application and conditions are proposed to be attached to the decision.

Condition(s) to be attached to decision for approval OR Reasons for recommendation to refuse

1) The development must be begun not later than the expiration of three years beginning with the date of this permission.

Reason - Required to be imposed pursuant to Section 91 of the Town and Country Planning Act 1990.

2) The development hereby approved shall be carried out in accordance with the following drawings and documents:

19972-HLC-000 Location Plan; 6777-M-DR-03 01 Rev B Proposed ASHP location; Proposed Elevations 1 – 4 ref 19972-HLC-204; Proposed Elevations 5 – 8 ref 19972-HLC-205; Proposed Elevations 9 – 13 ref 19972-HLC-206; Proposed Elevations 14 – 18 ref 19972-HLC-207; HALL

LANE RESOURCE CENTRE ELEVATIONS ref 6776-M-DR-02 Rev A; Proposed Ground Floor 19772-HLC-106; Proposed First Floor 19972-HLC-107; Proposed Second Floor 19972-HLC-108; Proposed Roof Plan 19972-HLC-109; Construction Details for Schneider GRP Unit Substation ref 900350-002 Rev 3; Indicative LV Distribution & Switchroom Layout ref 6100 Rev 1; Indicative PV Proposals Hall Lane Centre ref 6600 Rev 1; all as received by the City Council as local planning authority on the 1st December 2022

Noise Impact Assessment R2145-REP01A-JW prepared by Red Acoustics Limited as received by the City Council as local planning authority on the 15th February 2023; Glint and Glare Assessment Project No: 311761 prepared by Mabbett received by the City Council as local planning authority on the 22nd December 2022.

Reason - To ensure that the development is carried out in accordance with the approved plans. Pursuant to policies SP1 and DM1 of the Core Strategy.

3) a) Externally mounted ancillary plant, equipment and servicing (which shall include the electricity sub station) shall be selected and/or acoustically treated in accordance with a scheme designed so as to achieve a rating level of 5dB (LAeq) below the typical background (LA90) level at the nearest noise sensitive location. Prior to the first use of the hereby approved development the scheme shall be submitted to and approved in writing by the City Council as local planning authority in order to secure a reduction in the level of noise emanating from the site. The scheme shall be implemented in full before the use commences.

b) Prior to the operation of the scheme a verification report shall be submitted to and approved in writing by the City Council as local planning authority to validate that the work undertaken throughout the development conforms to the recommendations and requirements in the approved acoustic report. The report shall also undertake post completion testing to confirm that the noise criteria have been met. Any instances of nonconformity with the recommendations in the report shall be detailed along with any measures required to ensure compliance with the agreed noise criteria.

Reason - To minimise the impact of the development and to prevent a general increase in pre-existing background noise levels around the site pursuant to policy DM1 of the Core Strategy and saved policy DC26 of the Unitary Development Plan for the City of Manchester.

4) Prior to the installation of the fencing to the compounds around the approved electricity substation and Air Source Heat pump, details of the type and colour of the fencing to be installed shall be submitted to and approved in writing by the City Council as local planning authority. The development shall be carried out in accordance with the agreed details.

Reason – In the interests of visual amenity of the site and the character of the area in which the development is located pursuant to Core Strategy Policies SP1 and DM1.

5) Prior to the installation of the GRP housing to the electricity sub station details of the colouration of the GRP housing to be installed shall be submitted to and approved in writing by the City Council as local planning authority.

Reason - – In the interests of visual amenity of the site and the character of the area in which the development is located pursuant to Core Strategy Policies SP1 and DM1.

Informatives

1) Cadent Gas Ltd own and operate the gas infrastructure within the area of your development. There may be a legal interest (easements and other rights) in the land that restrict activity in proximity to Cadent assets in private land. The applicant must ensure that the proposed works do not infringe on legal rights of access and or restrictive covenants that exist.

If buildings or structures are proposed directly above the apparatus the development may only take place following diversion of the apparatus. The applicant should apply online to have apparatus diverted in advance of any works, by visiting cadentgas.com/diversions

Prior to carrying out works, including the construction of access points, please register on www.linesearchbeforeudig.co.uk to submit details of the planned works for review, ensuring requirements are adhered to.

Your responsibilities and obligations

Cadent may have a Deed of Easement on the pipeline, which provides us with a right of access for a number of functions and prevents change to existing ground levels, storage of materials. It also prevents the erection of permanent/temporary buildings, or structures. If necessary Cadent will take action to legally enforce the terms of the easement.

This informative does not constitute any formal agreement or consent for any proposed development work either generally or related to Cadent's easements or other rights, or any planning or building regulations applications.

Cadent Gas Ltd or their agents, servants or contractors do not accept any liability for any losses arising under or in connection with this information. This limit on liability applies to all and any claims in contract, tort (including negligence), misrepresentation (excluding fraudulent misrepresentation), breach of statutory duty or otherwise. This limit on liability does not exclude or restrict liability where prohibited by the law nor does it supersede the express terms of any related agreements.

If you need any further information or have any questions about the outcome, please contact Cadent at plantprotection@cadentgas.com or on 0800 688 588 quoting reference 28798353

2) The applicant's attention is drawn to the procedures for crane and tall equipment notifications, please see: <https://www.caa.co.uk/Commercial-industry/Airspace/Event-and-obstacle-notification/Cranenotification>
