You don't often get email from jon.fern@btinternet.com. [Learn why this is important](#)

Apologies that the below email was sent before I was finished - I am recovering from eye surgery so my eyesight is impaired. I have continued from where I left off...

Dear Mr Mitchell,

I wish to record my objection to the siting of a proposed 15 metre Mobile Mast at the junction of Fog Lane and Cranmer Road,

The grounds are that this is a wholly inappropriate location for such a mast being in an exclusively residential place. I would like to know what the grounds are for choosing this location and discounting other places which are non-residential. Please inform me of the following:

- The area in which you have considered siting this mast.
- Why locations such as the various car parks in the vicinity were rejected - car parks in Didsbury Village and the Christie Car park on Wilmslow Road are all close by and are in different directions from the proposed location (offering choice).
- Other possible locations that spring to mind are:

the new Christie Building - already an eyesore.

1. the old telecoms building between Mayville Drive and the Circuit, another comparative eyesore.

1. within Fog Lane park where there is a depot area already.

The above are all off the top of my head alternatives and find it extremely difficult to accept that the proposed location is in some way "optimal". I wonder whether in some way it is just convenient. There was no real attempt to consult locally and case made for the location.

I am not a NIMBY and would accept (for the greater good) a location decision backed by a fully transparent process with the case made for the decision set out clearly, including the reason why more obvious locations have been rejected. I would like to think that your decision was made on objectively justifiable grounds, in which case why is this not shared in a timely way ahead of any final decision being made.
