

QUOTATION

Quotation Ref: 7841

Date: 8/3/23

Client: Sanctuary

For the attention of: Emmeline Mcllory

Location of work: 28 Alness Road, Whalley Range, M16 8HR, Manchester

Description of work

Price:

TPO's – Any TPO's on trees?

Description:

In front garden of property is a large Robinia tree (952 on arbotrack) with shelf fungal brackets around the circumference of the base of the tree. The tree is showing sign of dieback in the outer crown and evidence of dropped branches. Shelf fungus causes decay and rot of the heartwood which leads to weakening of the tree.

Recommendation:

Fell as close to ground level as reasonably practical.
Remove arisings.
