

General Waste - We currently have a 660L general waste bin for the entire site - this is more than enough for the change of use.

We will increase our current mixed recycling (includes pulpable waste) from 1 x 240L to 1 x 660L

New Glass Recycling - 1 x 120L Glass recycling

Food Waste - Any fresh vegetable clippings are composted on site. Any cooked food goes into the general waste bin.

Industrial Waste - None.

Has a contract be obtained - yes

Internal Stores -

We will have 1 x 45L bins for - general waste,

We will have 1 x 10L bin for food waste,

We will have 2 x 20L bins for glass, and mixed (cardboard & tin).

Storage Areas -

Internally, we will save a place underneath the work tops and store the bins in this place.

Externally, the bins are stored to the side of the road into the compound around 15m walk from the kitchen.

Please see attached map.

Waste Store Ventilation & Hygiene / Store Proposals

Ventilation -

Externally, the waste store will be outside and will not need ventilation.

Internally, we have had contractors NUAIRE Ventilation Specialists calculate what ventilation requirements are needed for the space and will be installing the correct ventilation as part of the works.

Hygiene -

Externally, we will clean the bins quarterly to ensure the bins are kept clean and not smelling.

Internally, the bins will be kept clean by the kitchen staff as part of a weekly rota. Bins will be emptied as needed.

Details of who will be responsible for placing the bins at the collection point and returning them to the store -

The kitchen staff will be responsible for emptying the bins from the kitchen to the bin store.

The site manager & staff will be responsible for placing the bins at the collection point for collection.
