

Location of the timber stage within the Roman Gardens ↓

Model illustrating the proposed timber stage at night ↓

Design intent for the timber stage:

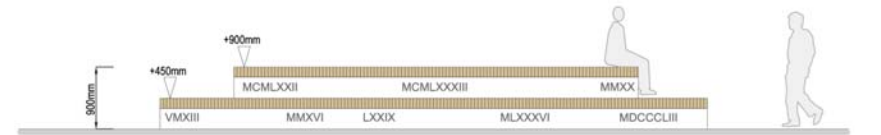

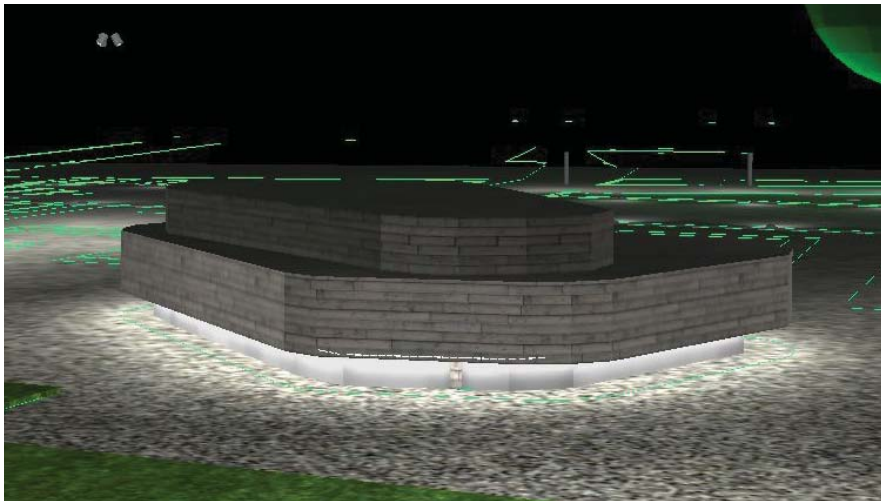

The timber stage will be located within the Park Square, adjacent to the Liverpool Road frontage of the Roman Gardens.

The stage will have two tiers. The height of the first tier will be 450mm, with the height of the second tier 900mm above the final floor level. This height will allow the stage to be utilised as an informal seating opportunity.

The base will be constructed from in-situ white concrete with a smooth facial finish. The timber top will be constructed from treated hardwood timber, secured to the concrete base.

To complement the time-line feature along the Roman Road, the concrete base will include type, imagery and patterns to reflect Castlefield's Roman heritage.

Continuous and low level lighting will be integrated around the first tier of the stage to provide both functional lighting and emphasise the stage as a feature element.

Images from middle left in a clockwise direction (not including the timber stage 3D model):

1. Engraved artwork, inspiration for inlaid text
2. Concrete wall with lettering
3. 2. Inspiration - Roman mosaic
3. Roman altar discovered at Knott Mill, Castlefield
4. Timber stage precedent image
5. Timber sketch with dimensions
6. Timber stage precedent image
