Dear Adam Mitchell

I am writing to object to the planned installation of a 15meter mast a the corner of Cranmer Road and Fog Lane. I am a long term resident on Fog Lane and do not believe this is a suitable site due to the residential nature of the area and the rather narrow , often flooded pavement on Fog Lane (due to blocked drains). I walk this route frequently as I use the Wilmslow Road buses. I find it hard to believe this is the most suitable site- we have no information as to its supposed advantages over other possible and less residential sites on wider roads- e.g Wilmslow Road – and further away from houses.

Yours sincerely

Professor Jill Rubery
