John,

23 Didsbury Park Manchester M20 5LH - 135961/TCA/2023

The applicant has proposed to carry out the following pruning works:

T1 Beech Tree, reduce the height by 3m, reduce the lateral branches over the highway by 2.5m and the lateral branches over the garden by 3m. Crown lift over highway to 6m. The finished height of the tree will be approx 15m and the lateral spread 9-10m.

T2 Holly Tree, crown lift over the pavement and road to 2.5m & 5.5m respectively. T3 Cherry Tree, clean out crown, crown lift over the pavement and road same height as the Holly tree.

The reason for the work is general maintenance and to prune the beech tree so it does not get to large for the location. The crown lifts are to meet with highway regulations.

I can confirm that we would have no objection to the proposed routine pruning work for this site.

FYI John, that is the kind of pruning specification I like to see.

Kind regards

Rudi Farghaly
