

Suggested plants for rain garden that are tolerant of wet and dry soils

Asplenium scolopendrium

Ajuga reptans 'Atropurpurea'

Persicaria affinis
'Darjeeling Red'

Crocosmia
'Orange Pekoe'

Carex morrowii 'Irish Green'

Alchemilla erythropoda

Astrantia major 'Ruby Wedding'

Dryopteris felix-mas

Geranium 'rozanne'

Deschampsia cespitosa

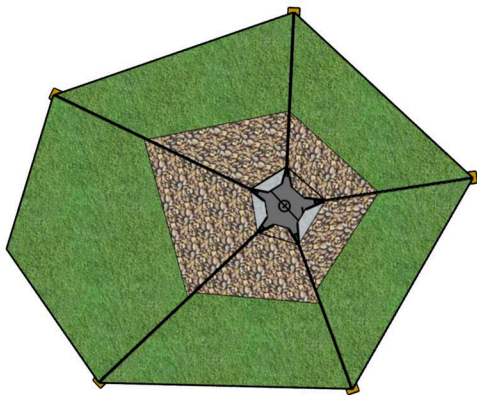

Suggested planting for extensive roof

Extensive green roof proposal, estimated depth between 75mm and 120mm including drainage system. Mixture of clean gravel and stone, interplanted with shallow rooting perennials, sedums and bulbs.

Ratio of gravel and stone to planting to be calculated based of rainwater run-off calculation required to fill water butt.

Indicative Roof Plan

Planting concentrated towards edges of roof area for ease of maintenance
