Easee Base

Easee Base is a robust and weather-resistant post that gives you greater freedom to install the Charging Robot

where it suits you best. Easee Base is available in three different configurations: choose between one, two or four Charging Robots on the same post and get the most out of the installation.

Easee Base – Solid post with scratch-resistant powder coating.

Choose to have e

Why choose

The post has a strong and

Easee Base?

Gives you bigger freedom

scratch-resistant powder coating which ensures long durability. Integrated cable hooks are available for 1-way and 2-way layouts. Thanks to the Power Rail connection, it's possible to connect several charging posts in series, which enables easier installation on larger external parking systems.

conditions.

Power rail

Connect several posts in series

1. Connected via Power Rail

Power Rail is a connection rail that allows several charging posts to be easily connected in series.

2. One, two or four?

Power Rail supports connection of up to 4 Charging Robots on one post. This is possible thanks to our patent pending and unique connection system.
