Subject: RE: Addington New Cross Central - External Lighting - Planning Issue

Jessica,

Further to the request below from MCC, it should be noted that it is very difficult to determine light spill levels for future buildings where information on the proposed developments is not available.

However, we can clarify that the external lighting design at the Addington New Cross Central development has been designed and installed in accordance with CIBSE/ILP guidance in terms of lighting levels and light spill based on the available information of the surrounding buildings.

If you need any further information please let me know.

Regards,

David Connor BEng (Hons.) IEng MCIBSE MSoPHE
Design Manager
