Comment Details

Commenter Type: Neighbour

Stance: Customer objects to the Planning Application

Comment Reasons:

Comment: I object to these plans because they are too close to a busy school. This would increase the pollution in the area, in the building & subsequent increase in traffic on surrounding roads. The roads are already very dangerous to navigate on foot or bike. This goes against the city councils, clean air, walking & cycling plans. There is no mention of the impact it would have on the school in the document. The noise & disruption throughout the construction would hinder the every day work of Chorlton High School. There is no discussion about the impact on a large number of pupils congregating near or in the store. The increase in cars & delivery lorries are detrimental to the environment & to the community as a whole. The area needs less less traffic, not more. I strongly object on health grounds & for the safety of the school children as well as the wider community.
