

SILVER BIRCH
Forma Composite
Panel Cladding

The image shows a modern building with a wall made of vertical grey composite panels. To the right of the building is a garden area with a gravel path, green grass, and several trees with yellow and orange autumn foliage. A dark blue or black fence is visible behind the trees. The text 'FORMA® COMPOSITE PANEL CLADDING' is overlaid on the bottom right of the image.

FORMA® COMPOSITE PANEL CLADDING

Ecoscape Forma® composite cladding is a long lasting, low maintenance alternative to timber that can be used on various exterior projects; from home renovation to new build apartments, sunrooms or contemporary garden rooms.

Forma composite panel cladding is made up of recycled high density polyethylene plastic and reclaimed wood fibres. With a durable polymer outer shell encapsulating the board, it forms an impermeable layer that protects it from scratching and fading.

Our tongue and groove capped cladding profiles are available in six colours, utilise a hidden fixing system and have a choice of six innovative fixing trims.
