Building Regulations 2010

This permission does not grant approval under Building Regulations.

Street Naming & Numbering Requirements

Manchester City Council is responsible for allocating street naming and numbering within Manchester for new developments or property conversions. Individuals or businesses are not permitted to allocate their own property numbers, building or street names.

If your development includes the creation of new dwellings (either new build or conversion of existing buildings), creation of new commercial properties or the subdivision of existing properties you must ensure that you request new or changes to addresses through us so they can be officially allocated and registered in accordance with the Public Health Act 1925 Sections 17-19 & Greater Manchester Act 1981 Section 22.

Failure to do this may result in difficulties for the developer/occupier when requiring services such as connections to utilities, phone lines and postal services and may delay your development.

You can apply online at the following address:

Mining Information

The proposed development lies within an area which could be subject to current coal mining or hazards resulting from past coal mining. Please read the Standing Advice from the Coal Authority in Appendix A.

It is recommended that the flat is fitted with a monitored alarm system with PIR monitors, it should comply with either:

- o BS EN 50131 and PD 6662 for wired systems
- o BS 6799 for wireless systems

The flat entrance door must be compliant with and certified to BS PAS 24. It is advised that these doors do not have fixed sidelights, and are provided with door viewers instead.

Any external bin store should be a secure, lockable and fire resistant enclosure.

Any new external fittings (i.e. shutters, windows or doors) should be certified to Secured by Design standards.

Lighting

Dusk 'til dawn lights, operated by photoelectric cell/daylight sensor, should be installed to all external doors (manual override is also permissible).

External lighting must be provided to the side passageway and rear of the building, operated by photoelectric cell/daylight sensor (manual override is also permissible). PIR security lighting is not recommended for these locations and should not be employed unless advised.

Fittings should produce 'white' light, as opposed to yellow/orange light. Metal halide (or bulbs with a comparable output) should be used, as these offer superior colour rendition over alternatives such as high and low pressure sodium bulbs.

Management & Maintenance

The upkeep of a development over its lifetime can be crucial to the level of security and safety within. Aspects of a development, which are left to deteriorate, have the potential to attract further crime - a process known as 'the broken window theory'. A maintenance plan should be drawn up to address issues such as:

- Litter removal

- Repair to communal areas (lighting, signage, access controls)
