

GLASSWORKS

SERVICING AND ACCESS STATEMENT

Refuse collections will be early morning and we will look to suppliers already operating in the area to minimise congestions and vehicles on the road.

Long term deliveries will be expected to utilise the loading bay on High Street and abide by local rules and regulations.

Short term / courier deliveries may be via Soap Street.

We will have a post room (already incorporated within the design) that is accessed from Soap Street, we propose manning this between the hours 05:00 hrs to 18:00 hrs. This will give a central point close to the road to receive goods, this will minimise time spent in the area.

We will have a dedicated point of contact at the building who will build relationships with the local area.

We will have an open transparent delivery calendar to try and monitor vehicle numbers in the area, we will try and actively manage to schedule and coordinate deliveries in the area to avoid congestion.

We will collect data and actively encourage tenants and building management to consolidate suppliers.

We are not permitting deliveries from Back Turner Street, or via the front of the buildings.

Please sign and return to Salboy to accept strategy
