Subject: Re: CDN/22/0625 - 5 Drybrook Close

Hi Harriet

Hope you are well.

I tried to call but could not get through to you. Is it okay if I give you the specification of the membrane via email?

We would like to use the following specification for the membrane

<https://visqueen.com/gas-protection/gas-membranes/gas-barrier>

- Multi-layer reinforced polyethylene gas barrier
- 20-micron aluminium foil
- BBA certified
- Complies with BS 8485:2015 + A1:2019 - the industry standard for methane and carbon dioxide protection

I have also attached the **technical data sheet** for your reference.

Let me know if you need any further information from me to discharge this condition?

I look forward to hearing from you soon.

Thank you

Saghir Hussain

Dear Saghir,

Re: Discharge of condition no. 6 (gas membrane) attached to 134197/FH/2022

Please find comments from Environmental Health officers:

"The information submitted to discharge the above condition is insufficient. The cross-section diagram is fine but there is no information regarding the gas membrane itself and the manufacturer specification for the one to be installed."

In light of this matter, the condition can not be discharged.

Best Wishes,

Harriet Aidoo (Assistant Planning Officer)
