Delegated officer report for planning application

Application no. 135083/FO/2022

Date registered valid: 6 October 2022

Proposal: Conversion of internal parking area to create a bin store, trade counter and cash and carry (sui generis), together with the installation of a new shopfront and external roller shutters to shopfront and bin store access

Address: 9-13 Broughton Lane, Manchester, M8 9TY

Ward(s): Cheetham Ward

Applicant: Mr C Gee, 56 Carrwood, Hale Barns, Altrincham, WA15 0EP

Agent (if any): Mr Chris Smith, Plan A (North West) Limited, 32 Aughton Road, Southport, PR8 2AG

Case officer: Steven McCoombe
Tel: 0161 234 4607
Email: steven.mccoombe@manchester.gov.uk

Recommendation: Approve

Date of recommendation: 24 November 2022

Departure from Development Plan: No

Environmental Statement: Not required

Description of site/building

The application site relates to a two-storey block which accommodates multiple commercial units (6) at ground and first floor level. The site is bounded by Broughton Lane to the north, Willow Street to the west and Vega Street to the east. To the south is further commercial block which is separate from the application building by an alleyway. Further south is courtyard style, commercial estate of similar uses.

The host block immediately adjoins the back of pavement and are currently occupied by a range of businesses, including mobile phone repair providers, cash and carry wholesalers and hot food takeaways. The units are supported by parking spaces located in a garage area accessed from Willow Street. The units all share waste disposal facilities located within communal areas and on the pavement.

Listed building: Not applicable

Conservation area: No

Tree Preservation Order: No

Description of area

The application site is situated within a predominantly commercial area, a short distance from the main arterial route of Bury New Road and within the designated 'workshop village' as defined by the Strangeways Local Plan.

The area is dominated by small scale wholesale and warehouse units selling a variety of goods, as well as a small number of food and drink uses. The immediate area comprises an estate of commercial units, with the site lying close to the main north/south route of Bury New Road. Other nearby uses include a petrol filling station and casino. The site is within Flood Zone 3.

Description of development

Planning permission is sought to create a single, large, internal bin store to meet the needs of tenants of the commercial block to which the floorspace relates.

It is further proposed to replace part of an existing internal parking area to displace approximately two spaces, together with the creation of small trade counter and cash and carry (sui generis) unit (approx. 30 sqm) in the residual space

Access for the bin store is proposed from Willow Street via an alleyway to the side (southern elevation) with new, electric roller shuttered opening. The bins are to be allocated to specific occupiers, with each hot foot takeaway tenant having its own bin. The other ground floor occupiers are to either share a bank of bins for general waste, plastics and cardboard, or be allocated their own bins. A separate smaller bin storage area accommodating three 360 litre bins for general waste, plastics and cardboard is to be delivered separately off Willow Street to serve the first-floor units. All waste collections are to be arranged via a contractor.

The proposed commercial unit is to incorporate a new, ground floor, glazed shop front. The large, existing roller shuttered frontage is to be replaced by a larger roller shuttered opening of the same design.

The application follows in part from existing issues surrounding fly tipping and general littering in the street which has prompted the Council's Neighbourhood Services team to request that the matter be resolved. The application is therefore a proposed solution, enabling waste management to be consolidated and properly managed.

The application also follows the recent approval of a similar scheme (Ref: 132963/FO/2022). The difference being that the current proposal offers a reconfigured internal arrangement comprising a slightly larger commercial unit and bin store, as the parking space previously retained have been omitted. In addition, the front elevation to Willow Street includes a single but larger shopfront, rather than two separate openings for the garage and commercial unit respectively.

Consultations & Notification Responses

Local Residents/Occupiers – No representations received.

Highway Services – The site is considered to be suitably accessible by sustainable modes and is in close proximity to a range of public transport facilities.

The existing parking restrictions prohibit parking at all times on Willow Street, Vega Street and adjacent to the development on Broughton Lane where peak hour loading restrictions also apply.

It is considered that the loss of internal parking is offset by an improvement to waste storage provision to the development which should help to minimise an adverse impact on the adjacent highway.

Given the size of the additional unit, it is considered that the associated comings and goings can be accommodated on the highway network.

It is recommended that secure cycle storage is provided for the development.

If the planning application be approved, it is required that a Construction Management Plan be conditioned.

Environmental Health – A condition is advised to ensure the development is implemented in accordance with the submitted waste management strategy.

Greater Manchester Police (Design for Security) – Various security specifications are advised.

Policy

The following policy and guidance is considered relevant to the consideration of this application:

- Saved policies CC10 and DC26 of the Unitary Development Plan for the City of Manchester;
- Policies DM1, SP1, EC1, EC4, CC1, T2 and EN14-19 of the Manchester Core Strategy;
- Strangeways Local Plan;
- National Planning Policy Guidance;
- National Planning Policy Framework (NPPF).

Issues

Principle

Policy and in particular, the Strangeways Local Plan, recognises the site as being within the warehouse district and therefore further businesses which support economic growth in the area are generally welcomed.

Saved Policy CC10 of the UDP encourages the continued high level of economic activity in Strangeways and lower Cheetham Hill Rd areas, recognising particularly the needs of the wholesale trades which dominate these areas, whilst Policy EC4 promotes economic development in north Manchester and specifically identifies the Strangeways Employment Area as being 'suitable for retention and growth of general industry, warehousing and distribution'.

Aligned to this, Policy DM1 advocates that all development shall consider the effects on amenity, including litter and that new development should consider the adequacy of refuse storage and collection.

Given the overarching policy context, it is considered that the general principle of the proposed development would be acceptable in this location, although other issues surrounding amenity, design, environmental issues, servicing and the impact on the highway also need to be considered. These issues are explored further below.

Visual Amenity

The proposal development will result in external changes to the appearance of the building. Namely, a new roller shuttered entrance to the side elevation facing the alleyway and a new shopfront to include roller shutters to Willow Street which will replace the existing opening.

The new roller shuttered opening to the side (south) elevation, would be largely unseen, due to the position of the neighbouring building which encloses the site.

To Willow Street, the proposed shop front and rollers shutters mirrors the design, materials and proportions of existing openings within the host block and is of a comparable design to neighbouring buildings in the wider, commercial area. Given the immediate context, it is considered that the proposed alterations will easily assimilate into the fabric of the street-scene, with no harmful effects to either the appearance of the existing building or the character of the area.

Impact to the Highway

Saved Policy CC10 relates specifically to the Cheetham area of Manchester and whilst it recognises the economic importance of wholesaling in the area, it advocates that permission should only be granted where proposals incorporate sufficient parking and servicing for their own needs.

Highway Services have assessed the proposal and raise no concerns.

It is agreed that the application site is situated within a sustainable location, accessed by a choice means of transport.

The modest amount of floorspace proposed (30 sqm) is highly unlikely to generate a high degree or frequency of vehicle movements or demand for parking. In any event, there are extensive parking restriction in the area which would prevent on-street parking.

Whilst the proposed use will result in the loss of a couple of parking spaces, given the nature of the use, which is not intended to be open to the general public, but rather trade customers, the loss of space is considered negligible and any demand for staff parking could be adequately catered for by the remaining two spaces. As such, the impact upon parking and the operation of the highway can be sustained in this instance.

In terms of servicing, this is to be undertaken from the highway along Willow Street, as parking restrictions do not prevent loading and unloading and the road width is sufficient for through access. Further, the host building already operates in these conditions and the timing and frequency of deliveries and waste collections etc. would remain unchanged. Indeed, the situation to the highway is likely be improved, due to having a single waste collection location, rather than the multiple locations at present. On this basis, the impact to the highway is considered satisfactory.

Other Highway Issues

Whilst Highway Services recommend cycle storage be included, it should be noted that the proposed development predominantly relates to existing operations, with only a small amount of additional floorspace proposed. Further, there is no space externally for such storage. Should staff wish to cycle, they will be able to store bikes internally within the premises,

The premises is only open to trade customers who are more likely to use other modes for travel for the collection of goods and therefore it is not considered that cycle storage provision would be of little use on this occasion.

Further, given reports of the high crime rate in the area and the unsuitability of external areas for cycle storage, it is not believed that there would be any tangible benefit of providing such a facility on this occasion.

Waste Management

The proposed bin storage facilities will address an existing waste issue in an effective and controllable manner.

The allocation of bins to specific occupiers will ensure that each business, but particularly the hot food takeaways, is able to implement an effective waste management strategy that manages odour, vermin and littering in an appropriate manner.

The total capacity of the waste containers has been calculated to exceed the demands of existing occupiers. in order to remove the potential for overspill or fly tipping.

Furthermore, the storage of the waste internally will ensure that it is not visible on the street scene.

Flood Risk

The site is situated within Flood Zone 3 and therefore is in area at a high risk of flooding.

In this case, the proposed development is considered, for matters associated with flood risk, to be a 'minor development' and therefore it is not necessary to consult the Environment Agency.

The application has however been appraised by the Council's Flood Risk Management team who advise that a number of measures surrounding finished floor levels and safety measures.

These has been included within an appropriate condition.

Climate Change

Given the modest level of vehicular trip generation proposed, in comparison to the existing use of the site, it considered unlikely that the proposed development would result in a significant change in air quality as a consequence of vehicular emissions and therefore the impact to climate change is believed to be satisfactory.

Human Rights Act 1998 considerations

This application needs to be considered against the provisions of the Human Rights Act 1998. Under Article 6, the applicants (and those third parties, including local residents, who have made representations) have a right to a fair hearing and to this end the local planning authority must give full consideration to their comments.

Protocol 1 Article 1, and Article 8 where appropriate, confer(s) a right of respect for a person's home, other land and business assets. In taking account of all material considerations, including Council policy as set out in the Core Strategy and saved policies of the Unitary Development Plan, the Director of Planning, Building Control & Licensing has concluded that some rights conferred by these articles on the applicant(s)/objector(s)/resident(s) and other occupiers and owners of nearby land that might be affected may be interfered with but that that interference is in accordance with the law and justified by being in the public interest and on the basis of the planning merits of the development proposal. She believes that any restriction on these rights posed by the recommendation given is proportionate to the wider benefits of and that such a decision falls within the margin of discretion afforded to the Council under the Town and Country Planning Acts.

Recommendation: Approve

Article 35 Declaration

Officers have worked with the applicant / agent in a positive and proactive manner to guide the application through all stages of the planning process and resolve any issues that arose in dealing with the planning application.

Condition(s) to be attached to decision for approval OR Reasons for recommendation to refuse

1) The development must be begun not later than the expiration of three years beginning with the date of this permission.

Reason - Required to be imposed pursuant to Section 91 of the Town and Country Planning Act 1990.

2) The development hereby approved shall be carried out in accordance with the following drawings and documents:

Drawings referenced C-472-SLP, C-0472-10/F and C00472-15/A, received by the City Council as Local Planning Authority on 30 September 2022.

Reason - To ensure that the development is carried out in accordance with the approved plans, pursuant to policies SP1 and DM1 of the Core Strategy.

3) The change of use hereby approved shall not become operational unless and until flood resilient measures have been submitted to and agreed by the City Council as Local Planning Authority.

-The internal and external levels shall be set in accordance with government Standing Advice;

- If finished flood levels cannot be raised 300 mm above the estimated flood level, flood resilience and resistance measures must be demonstrated in the design;

-Consideration of flood safety measures (such as signing up for EA flood warnings) and evacuation plans should be demonstrated.

The development shall only be implemented in accordance with the agreed details.

Reason - The site is situated within Flood Zone 3 and the measures are necessary in order to reduce the risk of flooding, pursuant to national guidance within the National Planning Policy Framework (NPPF) and policy EN14 of the Manchester Core Strategy.

4) The materials to be used for the external alterations (including roller shutters) hereby approved shall match those of the existing building in type, size, colour and texture.

Reason - To ensure the appearance of the building to be extended is not adversely affected, pursuant to policies DM1 and SP1 of the Manchester Core Strategy and the National Planning Policy Framework (NPPF).

5) The premises shall not be open outside the following hours:-

10.00 to 22.00 hrs daily.

Reason - In interests of amenity, in order to reduce noise and general disturbance in accordance with saved policy DC26 of the Unitary Development Plan for the City of Manchester and policies SP1 and DM1 of the Manchester Core Strategy.

6) Prior to the development hereby approved becoming operational, a Servicing Strategy shall be submitted to and agreed in writing by the City Council as Local Planning Authority. The strategy shall include details of the number and frequency of deliveries/collections, vehicle sizes, delivery times, access and safety arrangements. The agreed Strategy shall be implemented as part of the development and remain in use so long as the approved uses are operational.

Reason - To mitigate harm to the operation of the highway and the amenity of noise sensitive occupiers, pursuant to policies DM1 and SP1 of the Manchester Core Strategy.

7) The development hereby approved shall only be implemented in accordance with the waste management strategy detailed on drawing referenced C-0472-10/F and within the accompanying waste management pro forma received by the City Council as Local Planning Authority on 30 September 2022.

Reason - In the interests of amenity and public health, pursuant to policies DM1 and SP1 of the Manchester Core Strategy.

8) For the avoidance of doubt, the commercial unit hereby approved not shall be used for retail sales (Use Class E).

Reason - To ensure the premises are used for wholesale purposes only, pursuant to saved policy CC10 of the Unitary Development Plan for the City of Manchester.

Informatives

1) City Council records highlight that the underground River Irwell Tributary (Strangeways) is located within close proximity to the site (approximately 25m to the north of the site). Whilst the Council records are frequently updated to ensure the highest level of accuracy, the records cannot guarantee 100% accuracy for all City Council underground assets. Therefore, it is requested that the applicant informs the onsite contractor to remain observant and to take the appropriate safety precautions during any excavation works. If any major unknown drainage assets are found beneath the site, then further investigation works should take place to identify the asset and the City Council should be contacted immediately.

2) Any new signage may require separate advertisement consent. The applicant is advised to check with the City Council as Local Planning Authority prior to the installation of any signage or advertisements.

3) Greater Manchester Police advise that the proposed roller shutters and doors should be certified to LPS1175.

4) The applicant is advised that any requirements for licensing, hoarding / scaffolding and any associated temporary traffic management arrangements will need discussion and agreement with the council's Highways Applications and Network Resilience teams via Contact Manchester (Tel. 0161 234 5004).
