

Reasons for the removal of a sycamore tree on our property at

166 Bury Old Road, Salford M7 4QY

- 1) Continual and excessive seasonal disturbance ie.
 - a) Autumn / winter - leaf fall
 - b) Spring – sticky bud fall
 - c) Late summer / early autumn – seed drop.

- 2) The sycamore overhangs at roof level and the gutters of the bungalow require constant clearance 8-10 weeks apart.
- 3) Sycamore canopy overhangs the young beech tree (the branches of both overlap each other).
- 4) Continued leaf fall is now impossible for me to maintain a safe and hazard-free pathway outside my house.

I live alone, am 80 years old and am unable to keep up with the expense of the continual gutter and pathway clearances.

I beg you to please help me with the permission to enable me to continue with my life in my own home as long as possible.

Kind regards

Renette Goldstone
