

To Whom It May Concern

Following a detailed consultation with the House of Fu regarding their proposed development of the site at the Ground Floor Unit, 113-115 Portland Street, Manchester, M1 6DW we have assessed their waste and recycling requirements and propose the following site waste management plan:

- 2x lockable 1100l residual waste bins – lifted three times per week
- 2x lockable 1100l cardboard bin – lifted three times per week
- 1x 240l glass bin – lifted twice per week
- 3x lined 240l food waste bins – lifted three times per week

As the restaurant is a new branch and their level of custom has yet to be determined we are able to offer a flexible service and increase both the number of bins and frequency of service to meet the clients' demands and ensure the waste and recycling is removed in a safe, hygienic and compliant manner.

EMERGE Recycling is a well-established, waste management company which has been trading since 1996, we hold a Waste Carrier Licence (CBDL165955) and operate under Waste Operation Exemptions (WEX295899). We are ISO9001:2015 accredited and provide a source segregated waste and recycling service to over 1000+ clients across Greater Manchester & Liverpool. For further information about EMERGE and the services we offer please visit our website www.emergerecycling.co.uk.

EMERGE Recycling is supportive of this application, if a member of the planning team has any queries or would like clarification of any of the points raised above please do not hesitate to contact me.

Yours sincerely,

Gareth Jones
Managing Director
