Lancashire And Furness

Published 1848

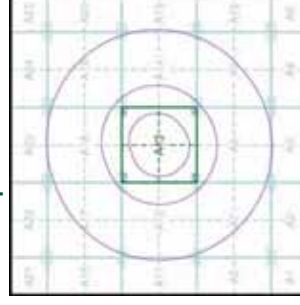

Source map scale - 1:10,560

The historical maps shown were reproduced from maps predominantly held at 1:2,500 scale for England, Wales and Scotland in the 1840's. In 1854 the Ordnance Survey (OS) was established and the 1:2,500 maps were used to update the 1:10,560 maps. The published date of the maps are often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas. In the late 1940's, a Provisional Edition was produced, which updated the 1:10,560 mapping from a number of sources. The maps appear unfinished - with all military camps and other strategic sites removed. These maps were initially overprinted with the National Grid. In 1970, the first 1:10,000 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

Manchester

Published 1975

Source map scale - 1:25,000

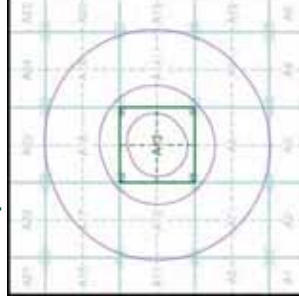

These maps were produced by the Russian military during the Cold War between 1950 and 1975, at a scale of 1:25,000 and 1:50,000. They are detailed maps, with colour-coded areas for development, parks, and non-developed areas. Buildings are coloured black and important buildings (such as hospitals, post offices, factories etc.) are numbered, with a numbered key describing their use.

They were produced by the Russians for the benefit of navigation, as well as strategic military sites and transport hubs, for use if they were to have invaded the U.K. The detailed information provided indicates that the areas were surveyed using land-based personnel, on the ground, in the cities that are mapped.

Published 1980 - 1981

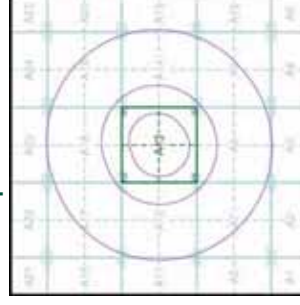

Source map scale - 1:10,000

The historical maps shown were reproduced from maps predominantly held at the time adopted for England, Wales and Scotland in the 1940's. In 1854, the first 1:10,000 scale maps were published. These maps were used to update the 1:50,000 maps. The published data then through the years has been updated. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas. In the late 1940's, a Provisional Edition was produced, which updated the 1:10,000 mapping from a number of sources. The maps appear unfinished - with all military camps and other strategic sites removed. These maps were initially overprinted with the National Grid. In 1970, the first 1:10,000 maps were produced using the Transverse Mercator Projection. The revision process continued until recently, with new editions appearing every 10 years or so for urban areas.

Ordnance Survey Plan

Published 1985 - 1987

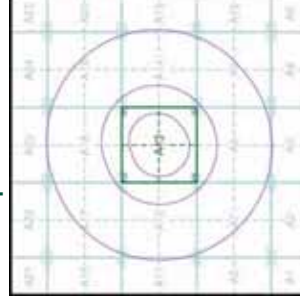

Source map scale - 1:10,000

The historical maps shown were reproduced from maps predominantly held at 1:10,000 scale for England, Wales and Scotland in the 1940's. In 1954, the Ordnance Survey decided to update its 1:10,000 maps. These maps were used to update the 1:10,000 maps. The published date is then the date of the survey. Some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas. In the late 1940's, a Provisional Edition was produced, which updated the 1:10,000 mapping from a number of sources. The maps appear unfinished - with all military camps and other strategic sites removed. These maps were initially overprinted with the National Grid. Source map scale - 1:10,000

The historical maps shown were reproduced from maps predominantly held at the state adopted for England, Wales and Scotland in the 1840's. In 1854 at the 1:250,000 scale was the first map of mapping urban areas; these maps were based on the Ordnance Survey 1:50,000 maps. The first map of the county was issued in 1861, 18 years later than the first map of the county. By 1938, all OS 1:50,000 maps were updated in the Cassini projection with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in surveying. In the late 1940's a Provisional Edition was introduced, which updated the 1:10,560 mapping from a number of sources. The maps appear to be unfinished - with all military camps and other strategic sites removed. These maps were initially overprinted with the National Grid. In 1970, the first 1:10,000 maps were produced using the Transverse Mercator Projection. The 1:10,000 maps were continued until recently, with new editions appearing every 10 years or so for urban areas.

10k Raster Mapping

Published 1999

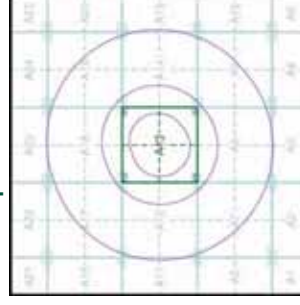

Source map scale - 1:10,000

The historical maps shown were produced from the Ordnance Survey's 1:10,000 colored map series, which were first published in 1970. The data is highly detailed showing buildings, roads, and field boundaries as well as all roads, tracks and paths. Road names are also included together with the relevant road number and classification. Boundary information includes county, unitary authority, district, civil parish and constituency.

VectorMap Local

Published 2019

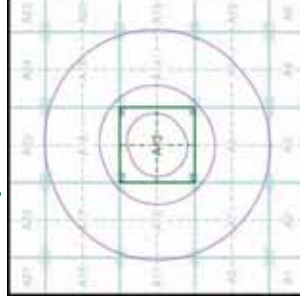

Source map scale - 1:10,000

VectorMap Local (Raster) is Ordnance Survey's highest detailed 'backdrop' mapping product. These maps are produced by OS's VectorMap Local, a mapping product that has been designed for creating graphical information of Great Britain, that has been designed for creating graphical information of Great Britain. VectorMap Local is derived from large-scale information surveyed at 1:250 scale (covering major towns and cities) 1:2500 scale (smaller towns, villages and developed rural areas) and 1:10,000 scale (mountain, moorland and river estuary areas).

Lancashire And Furness

Published 1851

Source map scale - 1:1,056

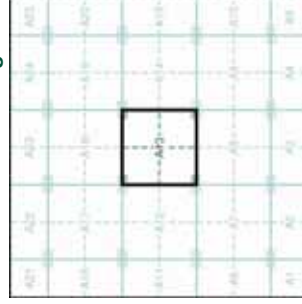

The 1:1,056 scale of Ordnance Survey mapping was adopted from Ireland in 1848 and was of better survey towns with a population of over 4,000, plus a number of smaller towns and villages. The scale was used for the first time in 1841-55. The scale was the last scale at which London was mapped by the Ordnance Survey and a 'sketch' survey of the capital, showing little more than streets, street names, frontages and altitudes, was undertaken between 1848 and 1850. The majority of the 1:1,056 surveys were later replaced by 1:500 surveys; although almost all the remainder were revised at this scale, sometimes more than once before 1895. The type of detail shown on the 1:1,056 scale is broadly similar to that on 1:500, the apparent omission of minor details such as sewer access points and street lights may be as much a reflection of the generally earlier date of these plans, as of the specification of the map.

Please note: Due to the partial coverage of Historical Town Plans, it is possible that not all segments within an order will contain mapping. Only the segments that have Town Plan coverage will be generated.
