MARBLE FLOOR - REFURBISHMENT

Gordon Ramsay
Lucky Cat
100 King St, Manchester M2 4WU

We will assess all the floor within the demise and work out the best way to refurbish the flooring back to its original finish.

Approaches to Refinishing Marble Floors

The requirement is deep clean and remove the staining from the tiles and create a fresh finish across the whole area.

We will be using Hard floor Restorations surfactant to bring back an original appearance to the floor, to begin we will pre clean to remove any abrasives from the surface, we will then remove the dirt and grime from the grout and marble using a combination of diamonds abrasives and our specialist cleaners to achieve the natural look back to the stone, next we will cut the floor to remove scratches, blemishes and marks from the marble and it will be then ready to be polished to high level of shine/glossy look. We mechanically polish the marble to create the best possible finish to the stone. The Final stage will be to seal the whole area of with our HR Sealers to a protection to the floor against water and oil-based staining, it will also aid with the ongoing maintenance that will be needed to keep the marble looking amazing for longer.
