

7374 - MOXY MANCHESTER

PROJECTED ILLUMINATED SIGNAGE PROPOSAL

North Facing View Looking Towards Hardman Street

South Facing View Looking Towards Atkinson Street

View from Little Quay Street 01

View from Little Quay Street 02

ILLUMINATED SIGNS & THEIR LOCATION

Proposed Sign 001

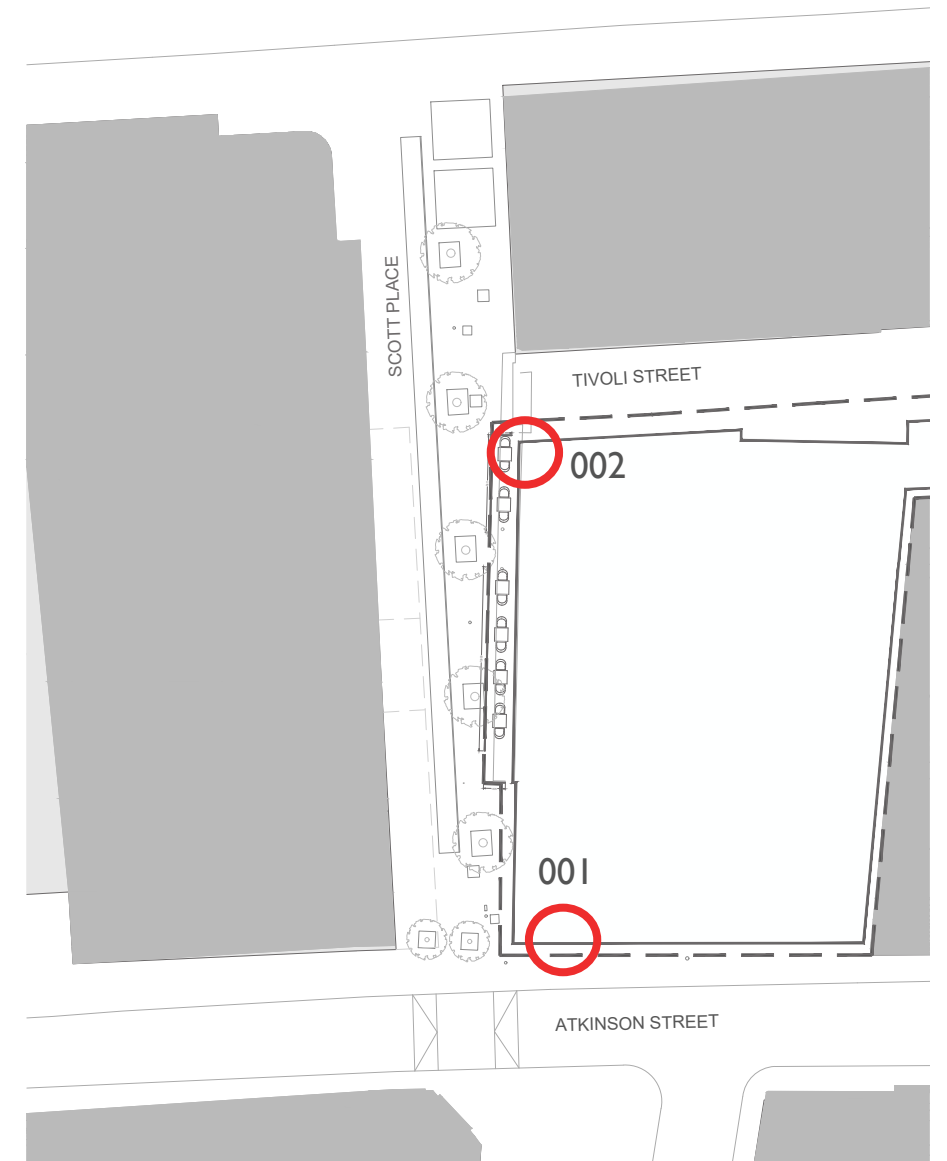

To enable clear visibility for the advertisement of Bar Moxy, there are 2 Signs provided.

Signage 001 is positioned within the corten steel framed window at the front of the building facing Atkinson Street. This is set at high level between the 2 top smaller windows which will allow the public to see the sign from both sides of Atkinson Street aswell as those at the bottom of little Quay Street just of the A34.

Proposed Sign 002

Signage 002 is located at the rear of the building projecting out from the newly constructed extension facing Nandos restaurant. This is also set above head height. The doubled sided protruding light box sign will aid customers and visitors towards the building more easily with sighting from Hardman Street. As a result of using both illuminated signs, the MOXY Bar LED lighting will ensure that the display messages are visible both day and night from all angles and directions.

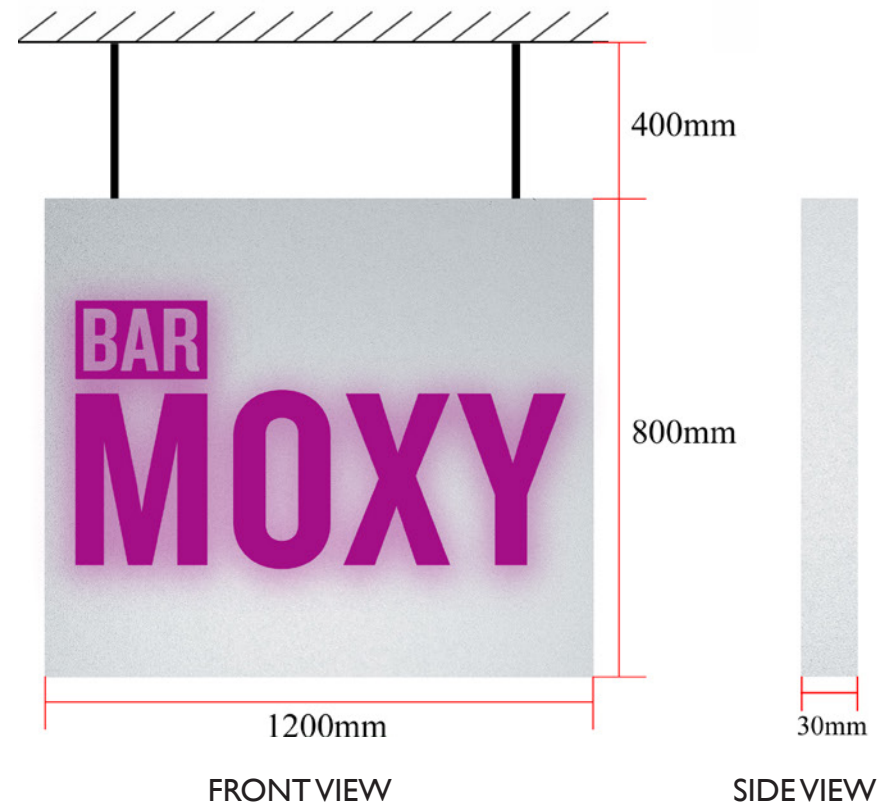

Proposed Signage Location Plan

Both signage options are to be illuminated with the Bar Moxy neon pink lettering. Please refer to the specification sheet for more information.

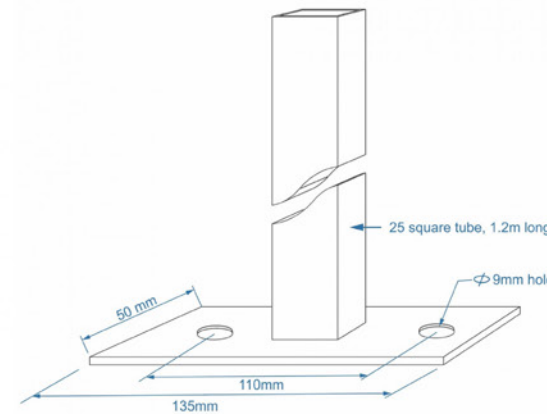

ILLUMINATED SIGN SPECIFICATION

NOTE: All images are for illustrative purposes only and NTS. Do not scale from this drawing. All measurements are indicative and subject to change following manufacturers detail
