

Shores Fold, Cringle Road
Condition 17 Waste Storage Strategy

The below photographs indicate the look and style of bin storage which we are proposing to install within the back garden of each property. The homeowners would be required to bring their bins around to the front of their private drives on bin day and then remove them once emptied back into their bin stores at the rear of the property.

The Site Layout shows an approximate location within each property garden where the bin store is intended to be located.
