

132456/FO/2021 : Condition 6

Melland High School

Job No. 20-030

6) Before the development commences a scheme for the storage and disposal of refuse shall be submitted to and approved in writing by the City Council as local planning authority. This should include evidence which demonstrates that there is sufficient capacity within the existing arrangements for the anticipated increase in pupils and associated staff, or the indication of revised scheme if such sufficient existing capacity is not demonstrated. The details of the approved scheme shall be implemented as part of the development and shall remain in situ whilst the use or development is in operation.

Site Plan 20-0303-2100 shows the service yard and bin storage compound to the left hand side of the drawing. The bin store contains all the waste storage for both Melland High School and Cedar Mount Academy. The store provides sufficient area for 12no. 1100 litre euro bins and a 8yd skip.

The current waste for the combined schools is emptied as follows:

Skip used for general waste is emptied 3 times a week.

2no. cardboard euro bins are emptied twice a week

3no food waste euro bins are emptied once a week

The proposed extension to the school adds an extra 9% of area to the school providing 8 additional classrooms for special needs children. The classrooms don't generate great quantities of waste and the Building Manager currently has capacity within the skip that is collected three times a week to cope with the small increase in waste from the new extension.

The school is not planning to add additional waste collection requirements however should it be required there is capacity within the bin store for additional bins
