Part 2 – Particulars of decision

Manchester City Council gives notice that the detail(s) referred to in Part 1 are **Refused** in accordance with the information set out below.

Condition 27 - Contam

Environmental Health have looked at the information submitted. In the remediation strategy that there was going to be "Installation of hydrocarbon resistant membranes within proposed plots." They could not find clarification of which plots required this.

Section 4.1 of the validation completion report states that "The ground gas assessment, as detailed within the Capita Geo-Environmental Report, indicated that the site is Characteristic Situation 2 - Amber 1, thus requiring mitigation measures that conform to BS8485 2015) (A1-2019) in the construction of new homes. Due to the presence of hydrocarbon vapours within the Made Ground, all plots all required the installation of a hydrocarbon resistant membrane to be constructed in accordance with BS8485 (2015)."

According to the validation report plots 47 & 50-54 only have a Visqueen membrane fitted. All other plots (1-46 & 48-49) and the Extra Care Building have the Hydrocarbon Resistant Membrane (VOC Blok & Visqueen GX).

Environmental Health cannot recommend discharging the condition until we have clarification as to why these plots were not fitted with the Hydrocarbon resistant membrane as required.

With regard to the cover system validation, this is acceptable for the gardens of plots 1-54 and for the Extra Care building's landscaped areas. The validation information for site E (Apartment Block A) is outstanding (cover system). Validation information for the Health Hub is outstanding.
