RE: ARCHAEOLOGICAL WORKS AT COLLYHURST VILLAGE

Dear Georgina,

Having reviewed the plan you sent me of the red lined area around Marston Street and Rochdale Road (Drawing 8871-BA-PD-00-DR-A-(04)091) I can confirm that no archaeological works should be necessary in that area. The archaeological desk-based assessment (*Collyhurst Village, Rochdale Road, Collyhurst, Manchester: Archaeological Desk-Based Assessment* Salford Archaeology December 2020) highlights two areas with potential for buried archaeologically significant remains. These comprise a narrow strip of land along the former line of Churnet Street at its junction with Rochdale, and a second larger area bounded by the current Churnet Street and Anslow Close. The former strip along Churnet Street has been excavated and the relevant report produced and approved by Greater Manchester Archaeological Advisory Service (GMAAS). The area depicted on drawing 8871-BA-PD-00-DR-A-(04)091 lies to the north of this and has not been highlighted as having potential for buried archaeological remains therefore no archaeological works are required within this area.

Yours sincerely

GRAHAM MOTTERSHEAD
(Excavations Manager, Salford Archaeology)
