

All dimensions to be checked on site prior to the commencement of works.

Any drains passing under building to be exposed & encased in 150mm conc.

An architectural line drawing of a house elevation. The house features a gabled roof with a chimney on the left side. The front facade has four rectangular windows arranged in a 2x2 grid on the left side. To the right of the chimney, there is a larger window with a 2x2 grid pattern. Below this larger window is a long, narrow horizontal element, possibly a baseboard or a low wall. On the far right, a person is standing next to a vertical rectangular element, possibly a door or a wall section. The ground is represented by a simple horizontal line with some texture.

An architectural elevation drawing of a two-story building. The building features two gabled sections on either side of a central recessed area. Each gabled section has two windows: a smaller one on the upper floor and a larger one on the lower floor. The windows are divided into four panes. A human figure is shown walking on the left side of the building for scale, and another human figure is shown standing on the right side, pointing towards the building. A dashed line on the far right indicates a continuation of the building. The drawing is a line art style with no shading.
