

Gable Nest Box

A substantial wooden bird box with a gable roof and 28mm entrance hole. Made of 15mm thick softwood, external dimensions 14.5cm x 14.5cm x 26cm high (to top of gable). Suitable for the smaller garden birds.

A03008 Gable Nest Box

**Wooden Bird Box**

A simple wooden bird box with sloping roof, suitable for the smaller garden birds. Made from substantial 2cm thick softwood. 14cm w x 18cm d x 26cm h (backplate 33.5cm h). The standard model has a 32mm diameter entrance hole attractive to a wide range of smaller garden birds.

A03004 Wooden Bird Box

**Roosting Pockets.**

These attractive roosting/nest pockets can be used by wild birds in autumn, winter and spring. The birds can save energy during the colder months by roosting in a sheltered place. These pockets also provide a warm nesting place in the spring for smaller birds such as wrens. Made from natural materials. The pockets have a wire at the back to fix onto a branch, or they can be stapled or nailed to a fence or trellis with plant cover. Pack of 3 assorted roost pockets (styles may vary).

DESCRIPTION	KEY INFORMATION	DELIVERY & RETURNS
-------------	-----------------	--------------------

MATERIAL: Woodstone

DIMENSIONS (MM): 210 x 305 x 190

INTERNAL DIMENSIONS (MM): 120 x 240 x 120

ENTRANCE (MM): 32

WEIGHT (KG): 6

SPECIES: Great Tit, Blue Tit, Tree Sparrow, Pied Flycatcher, Redstart, Crested Tit

SITING: Hang the artificial nests for the house martin on the façade of the house or barn, directly under the roof gutter or the overhang. Preferably on the east or northeast side, preferably with several nests together as House Martins are colonial nesters. No nesting material needs to be added. The artificial nests are supplied with mounting material, two plugs and screws.

MAINTENANCE: The house martin nests will need to be cleaned and inspected once a year from October. For cleaning, you can turn the hook on the front of the nest bowl one turn and slide the nest out of the drawer. The suspension will need to be checked, as well as the condition of the entire artificial nest.
