

Waste Management

Bar San Juan 56 Beech Road

M21 9EG

Bar San Juan has 2 general mixed Recycling waste containers and 2 glass containers since it opened in 2011, to cover the current waste and the potential extra waste created by the upstairs proposed plan we will have in total 3 x general mixed Recycling waste containers at 1100 LTR are collected twice a week and 3 x glass containers at 240 LTR are collected once a week. A total of 6 collections at 1100 LTR = (6600 LTR) of mixed recycling waste and 3 collections at 240 LTR = (720 LTR) of glass a week by Veolia waste management company.

The 3 containers of glass will be stored at the back of the building under the fire exit stairs coming down from the upstairs proposed plan and checked that they are closed properly every night.

The last time to deposit glass in the Veolia glass containers is at 7pm to avoid late noise in the alleyway, the glass produced after 7pm is kept inside the restaurant in 4 containers of 20 LTR and it gets thrown in the Veolia glass containers in the morning between 9am and 12am. The three glass containers will be collected from the back of the building on Tuesdays between 7am and 10am and left in the alleyway by the side of the building, off the public highway and pulled to the back of the building by staff between 9am and 12am.

The 3 containers will be stored at the back of the building and checked they are securely closed every night.

Staff will deposit the waste in heavy duty 18x 32x42"/20kg capacity closed bin bags. The 3 bins will be collected on Tuesdays and Fridays between 7am and 10 pm and they will be pulled down the alleyway from the back and left empty in the alleyway by the side of the building until staff clean the bin storage space between 8am and 10am, they will then be pulled to the back of the building. The bins are replaced by Veolia if they get damaged or too dirty so kept in good condition.
