Details of the pre-application advice received

The information set out for submission is considered to be acceptable and given the circumstances, on this occasion, an acoustic study will not be required as part of the validation process.

I would ask that you design any external plant to meet the requirements I have set out below. I hope this helps but if you need any further clarification just let me know.

a) Externally mounted ancillary plant, equipment and servicing shall be selected and/or acoustically treated in accordance with a scheme designed so as to achieve a rating level of 5dB (LAeq) below the typical background(LA90) level at the nearest noise sensitive location.

b) Prior to the first operation of the proposed plant, a verification report shall be submitted to and approved in writing by the City Council as local planning authority to validate that the work undertaken throughout the development conforms to the acoustic requirements as set out in part (a) above. The report shall also undertake post completion testing to confirm that the noise criteria have been met. Any instances of non-conformity with the recommendations in the report shall be detailed along with any measures required to ensure compliance with the agreed noise criteria.

It is an important principle of decision-making that the process is open and transparent.

For the purposes of this question, "related to" means related, by birth or otherwise, closely enough that a fair-minded and informed observer, having considered the facts, would conclude that there was bias on the part of the decision-maker in the Local Planning Authority.
