

Conservation

Textured Concrete Paving

- Combines the appearance of granite aggregate with precision manufacturing further enhanced by a secondary shot blasting process.
- The texturing process of the units allows the aggregate core to be displayed adding a further dimension to this product.
- 48.3% recycled material is used in the production of the Conservation range.
- Available in 3 colours.
- Product compliant to BS EN 1339: 2003.
- A full colour range of complementary Conservation Kerbs, Edging, Setts and Mistral CBP available.

Colours

Precise colour and surface texture should be judged from actual materials rather than photographic representations.

Charcoal

Harvest Buff

Silver Grey

Silver Grey Conservation Textured, The Fort Retail Park, Manchester
