

The Whitworth retaining wall - PN 8529

Site meeting held on 24 January at 10:30 with Paul Mason (MCC), Emily Booth (MCC), Jo Wavish (UoM) and Ben Webber (M&CC) to review the proposed brick, mortar and terracotta samples.

BRICK SAMPLES

Old Victorian Pressed Medium Light Standard Weathering (left hand side on photo with both samples shown) was chosen as the best match, due to the smoother brick faces matching the smoother brick faces of the retaining wall.

MORTAR SAMPLES

Horton & Clinker and Nosterfield & PFA Pozzolan felt to be best matches of the samples given.

Ben to check that the samples are labelled correctly.

Paul requested a darker grey sample of the Horton & Clinker.

TERRACOTTA SAMPLES

Darwen Terracotta are to supply the terracotta. They have previously supplied terracotta coping at Jabez Clegg, as part of a roof project where damaged coping was replaced.

A sample has been taken for Darwen to match. Match to be agreed once sample is available. Jo to issue photos of Jabez Clegg terracotta works – photos below.
