Supporting information requirements

Where a development proposal is likely to affect features of biodiversity or geological conservation interest, you will need to submit, with the application, sufficient information and assessments to allow the local planning authority to determine the proposal.

Failure to submit all information required will result in your application being deemed invalid. It will not be considered valid until all information required by the local planning authority has been submitted.

Your local planning authority will be able to advise on the content of any assessments that may be required.

Biodiversity net gain

Biodiversity net gain is a legal requirement for planning permission introduced on 12 February 2024. All applications are required to either provide detailed information proving there will be a biodiversity increase; or explain why the requirement does not apply to the development.

Do you believe that, if the development is granted permission, the general Biodiversity Gain Condition (as set out in Paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990 (as amended)) would apply?

◯ Yes
⊘ No

Biodiversity net gain has been introduced as a general condition for planning permission. As set out in The Environment Act 2021: "grants of planning permission in England [are] to be subject to a condition to secure that the biodiversity gain objective is met". Therefore, in England, all planning permissions are generally subject to biodiversity gain rules, unless they are specifically exempt or out of scope.

If you have stated that the biodiversity net gain requirement does not apply to your application you must provide the reason(s) why, and may also need to supply evidence (especially where you believe the application is eligible for the 'de minimis' exemption).

Please add all the reasons why biodiversity net gain does not apply and enter a justification for each one

Reason biodiversity net gain does not apply:
Development subject to the de minimis exemption (development below the threshold)

What best describes the size of your site?:
Over 25 square metres

Please justify the reason why biodiversity net gain does not apply:
The application site is subject to the de minimis exemption. The proposals do not negatively impact or alter any habitat. Whilst the total site exceeds 25sqm, the existing site does not contain any existing trees, hedgerows or formal planting. The existing site is covered with gravel and concrete paving flags. These materials have a zero biodiversity score, meaning that the application site is exempted from any net gain requirements. The proposed development does not impact a priority habitat and does not include any on-site linear habitats, and as such the proposals have no impact on pre-development biodiversity.

Note: Please read the help text for further information why developments may be exempt or not in scope.

Please state how foul sewage is to be disposed of:

◯ Yes
⊘ No

Have arrangements been made for the separate storage and collection of recyclable waste?

◯ Yes
⊘ No

Trade Effluent

Does the proposal involve the need to dispose of trade effluents or trade waste?

◯ Yes
⊘ No

Residential/Dwelling Units

Does your proposal include the gain, loss or change of use of residential units?

Details of the pre-application advice received

A pre-application design development pack was submitted and this was followed by a site meeting on 27th January 2026.
The Planning Officer was supportive of the design proposals on the basis that all other potential options for the siting of the new chillers had been investigated and ruled out. The LPA were supportive of the laser cut design for the decorative metal screening being inspired by the history of Balloon Street and it was agreed that the detail of this could be dealt with by Condition.
