Key -

this will be were material are stored. Although states ‘Sports pavilion’, this is actually a secure car park, with 9 foot sturdy fence space left for access to the gate leading onto the playing field. The Skip for waste will also be stored here. This will prevent damage to the playing area but also minimise children having proximity to machinery etc.

storage container where tools, small plant / machinery can be stored.

The plan is to use the top soil and turf from the practice net area, and (with many helpers) wheelbarrow to these currently at barren areas to improve the ground both environmentally and aesthetically. This will also reduce the need for lots of waste to be removed from the ground and also reduce costs.

Welfare facilities – the contractors will have full access to the club toilets, washing facilities, electricity, water, tea / coffee making facility located in changing rooms and scorers’ room.
